Transcript

00:00 Alicia L.: how AI agents can improve our life, our productivity, our efficient, and then how we can also do this for clients, alright? Everybody ready? I am so excited, and if you know me, you know that I love to share But to start off today, we're gonna start off by having some fun. Is everybody in for having some fun? Yes? Let's start off the day by having some fun. Open up your ChatGPT account. Oh, did we tell you this was gonna be workshop style? Did we tell you it's gonna be workshopped out? Because it is workshop style. You are going to be working. So, I want you to go ahead and open up ChatGPT Style. Is everybody okay with workshop style? What I forgot to ask,

00:27 Alicia L.: Is anybody here new to training or working with me? Is anybody new? Just type new in the chat if you are new. If you are new, type new in the chat. I know we have a lot of new people. Welcome, new people! And new people, if you have a friend who is not all in on AI yet, send them the link to come join us real quick, alright? So, if you are new, my style of teaching and training as your AI coach is through live demonstrations. Of course, I'm gonna show you different things, all this kind of stuff, but I'm also going to be doing... Live demonstrations and workshop styles, so you'll be doing stuff along with me. So if you're new, welcome, and I'm excited to be your AI coach. By the way, I'm your AI coach from this moment on for the rest of your life. So... I will be on you all the time, helping you to elevate with AI. So somebody say, hey, coach, in the chat.

01:27 Alicia L.: Say, hey, coach! Hey! Because I'm so excited to be your coach.

For those of you that are new, I love this. I am all in on AI, I love it. I love teaching and training on AI, so... you are making my day by showing up and allowing me to power into you, so welcome. Now, if you have been here before, and you've been to some of our previous trainings before, I welcome you back as well, so welcome back. If you've been here before. And I would just ask you, you know, help me in the chat if there's somebody who has a very basic question that you can answer, answer it for me, because each one help one.

02:06 Alicia L.: And if you love it here, say like Nicole just did in the chat, say we love it here, or just say, love it, so I know that you're back. If you're back, just say, we love it here, or love it here, so I know that you're back. Look at everybody who's back for another training! Who's back for another training? Good job. Thank you, everybody. Thank you, thank you, thank you. Alright, so, I have ChatGPT up, and we're gonna start off with this. And the reason that we're using ChatGPT for this is because we're actually gonna create an image.

02:38 Alicia L.: So, you can go to chatgpt.com, press the plus sign and press image, or... Um, you can go to ChatGBT.com forward slash images, and you'll get to the images page, alright? Steven says upgraded to executive, I love it. You upgraded to executive. Kimberly, one of our staff members, will take care of you. If customer service can also be in the chat. That would be amazing! Alright, perfect. So, ChatGPT... dot com forward slash images. Now, let me do this first.

03:10 Alicia L.: And then I will give you the prompt. So, I have a prompt here that says... Um, oops, that's part two of the prompt. Let me go to part one. Yes, I have a notes document for you today, where you'll get the prompt. One thing that I've learned, though, is for me to do it first, and then show you how to do it, Otherwise, uh, you guys... Don't even pay attention, you put the prompt in, and then you ask me a question later, and I'm like, I just showed you that. Okay.

03:42 Alicia L.: So, hair is today's prompt, right? And this prompt right here is about a hand... a hand-drawn doodle illustration. And, um, with this hand drop... This is, like, a tongue twister. With this hand-drawn doodle illustration, I'm also going to upload my picture. The only thing that you're gonna change in this prompt, or you might change, is the description of you. So, you can see this says, hand-drawn doodle illustrations, simple black line cartoon character of a black woman, see uploaded images to use as a reference image, with her

natural curls sitting at a desktop with a laptop, Playful handwritten tasks, colorful markle highlights, minimal shading, off-white background, notebook sketch aesthetics, and it's a social media graphic. And then I'm gonna press go.

04:33 Alicia L.: So, you have a document today, I will... I will bold this, um, just to remind you that you could change that. And how... and change up the description. Some of you are pretty advanced, especially if you're in our consultant program, or you've been to some of our trainings. You can change this. So, change it if you want. And then now it's gonna sketch this out. So, go ahead, this is part one of the prompt, and I only want you to do this one. Um, team, if you would share today's notes in the chat, that would be fantastic.

05:09 Alicia L.: The... the prompt for today's notes... Um, I sent it in the live team chat. Let me see... I can do it. Today's notes... Bam! So there's today's notes, and then I'll also put the prompt in the chat. Okay, Abby, put it in. Thank you, Abby. Um, perfect, perfect, and I also sent... put in the chat, um, and if someone from customer service can help, Shalita? Thank you. Alright, Trish repasted today's notes. Okay, so these are today's notes. So you should have this illustration something like this. tell me when this is done, and you have your first illustration. Alright, and then we're gonna go to Part 2.

05:59 Alicia L.: Done, done, done, done, love it! Can we post it? Yes. So if you want to post it in the chat to show everybody, or to show me, click on the link, and then there's gonna be a download button in your top right, And you can download the image and just drag it to the chat, and you can paste it in the chat, right? You can also click on it, click Save Image As, however you would save images. There's a million ways to do it, but paste yours. Yes, you can paste yours in the chat.

06:29 Alicia L.: Um, alright, so... uh, Erica, and you added more color to it, I can tell. So, you guys can add more to it, change it around... This is the prompt. I'm putting... I put the prompt back in the chat, and if the team can put today's notes back in the chat as well. Now, go ahead and download it and post yours in the chat, and then we're gonna get to Part 2. Perfect, perfect, perfect, perfect.

06:56 Alicia L.: Alright, and yes, take that prompt and change it up. I see some of you changing it up very creatively. You're changing up the colors, or what it says on the image as well, and that is fantastic, alright? Good job, good job, good job. Alright, if anybody needs help, talk about what your problem is so

someone else can help you, but let me recap. All we did was we went to ChatGPT.com, forward slash images. If you're just joining us, welcome! ChatGBT.com forward slash image. We took this first prompt, Hand-drawn doodle illustration. Woman sitting at a laptop, you change it up for you, whatever you want. Black and white, more color, it didn't matter, change up the prompt, be creative.

07:43 Alicia L.: But upload, add a photo of yourself, right? So I added a photo of myself. I don't even know where that one went. But I added a photo of myself, pressed go, And then here's what I have right here. And then everybody is downloading it and pasting it into the chat, and if you love somebody else's image, give it some hearts and emojis. Alright. Here's where we're going with it, though. You ready for Part 2, say ready, ready in the chat if you're ready for part two. Good job, everybody.

08:13 Alicia L.: Good job! Are you ready for part two? Ready! Tuesday Tax Solutions. I love yours. I recognize your face. What's your name, Tuesday Tax Solutions? Um, you guys are doing a really good job. Okay, so, so keep that image right there. Then you're gonna go back, Um, to part two of this prompt. So, on today's notes, here's part one, hand-drawn illustration. Part two is okay, Now use this style, let me do it first. Now use this style to create an org chart for this person. This person has 5 AI agents that work under her.

08:46 Alicia L.: Patty, press release writer Felipe, funnel builder Emma, email marketer Cody, copywriter Debbie, designer. Take your time to create your... 5 people that work under you. I said people. Five AI agents that work under you, you know, give them a name and a role, And then you could say this person, you can put your name there, and if you do that, It should add it to the image, so I'm gonna do it first, and then you are off and running.

09:19 Alicia L.: I know some of you already have it done and posted in the chat, don't you? Where are my overachievers that already did this? And it's in the chat. Alright. So now, I said, use this and create an org chart. this person has 5 AI agents that work under her. Patty, press release writer, Felipe, funnel builder, And so it's gonna show the AI team that is going to be working under me. Um, Son of the Moon, I love your red jacket and your image there. You guys are creating some amazing images. You're creating some amazing images. Um, I love it, I love it. And a lot of you turn this prompt around and created some

cool things with it. So, I love it. Perfect. Alright, there we go. Alright, now it's still creating my team.

10:10 Alicia L.: It's still creating my team. If you've already outdone your images and don't have enough for today, somebody said that, Marie, um, Dale, then... go back tomorrow, work on this tomorrow, but this is ChatGPT images. Now, Jay Owen did amazing. I love how you even told it to give, or maybe you did or didn't, but you told it to give...

10:30 Alicia L.: like, nice representations of your team, it's colorful, I like the illustrations. So you're doing good. So, see, mine says I'm making too many requests. But now, here's my team. And so, uh, it says, my AI team, Alicia Little, CEO and visionary. Leading with strategy powered by AI. My... my agents, Patty, Felipe, Emmy, Emma, Cody, and Debbie. Do you see that real... Real quick, do you... does everybody see that org chart? Irene, you did fantastic! You did fantastic. So, last but not least, we're gonna create your dream team org chart, and then for homework, After you've had a session today, you're going to post on social media that you have created your... that you're creating, or you created your AI dream team, um, and people will love to see this here. Alright, so these are your AI agents. See how it says my AI agents underneath it? It did it for... Almost everybody, where it says my AI agents. Good job on the illustrations, everybody. Good job here.

11:36 Alicia L.: So, the next thing that you could do... I love that, Doctor. Adrian, that looks fantastic. You guys are doing so good with your images! Come on, Angela, fantastic! You guys are doing really good with your images. The next thing you could do is you could change up the style or anything that you want about this. So, how do you do something like that? You would just say, okay, I love this.

12:04 Alicia L.: change the style of this... image to be Pixar... style... And then I'm gonna say cute and colorful. You could then take it another way, and you could say, change the style to be professional and corporate, whatever you want. You can change your style. Gabrielle... Gabriella, what style did you choose? Yours is really cute, put it in the chat. What style did you choose? And tell everybody. Um, and some of you are being very specific. Amy, okay, just looking at your different styles that you chose here. Alright, everybody, did you build your AI dream team? Jasmine, good job! Angela! Good job! Marta and Shoshana, good

job. I cannot wait to see your team, though, build your team underneath it.

12:54 Alicia L.: Danielle, um, Danielle Roberts. Danielle, your stuff always looks good. I want to give you a shout-out. You... You do so well on social media with your AI, and your AI twin, your image looks phenomenal. Good job. Alright, everybody, good job, good job, good job, good job. Um, I love what Michelle did as well. She has her AI team looking like robots, but also think about your client. So, if you are working with a client, and you want to recommend to them that they set up an AI team. Are a lot of people visuals? And if you make a proposal to a client, And you... they get to see their AI team members, like, you're like, okay, Alicia, this is what I'm recommending for you. You're the CEO, and I'm recommending that you have a 5-agent AI team And these would be your AI agents and what they do. Would this, yes or no, Or give me one word that would describe how your future client that you're about to land would feel if you gave them a visual actually showing them what it looks like for them to have an AI team. Would that make... The client would be activated. Yep, um... excited, yep, amazed.

14:13 Alicia L.: comfortable, it's tangible, the client would be impressed, mind-blown. I like the person that says it makes it tangible. You're right, it does... It does make it very tangible, so I do like that you said that as well. It makes it very tangible. for them. It makes them impressed, motivated. Um, so... yep, so I'm gonna do a quick recap for those that just joined us, or are having trouble following, so give me one second to do a recap while everybody else pastes theirs.

14:41 Alicia L.: There's in. Now, I just changed my style. Do you see Tiffany? Good to see you here. Do you see how when I change the style, everything, it changes there. The look of the characters, everything changes with the style. Do you guys see that? So now, especially if you're here and you're an AI consultant, change the style really quickly. I did Pixar, but do whatever style that you want to do, and let's see... your style. Veronica, you did, like, a realistic style, Cece did, like, a... water color or water sketch. Von Dell did a Pixar style, I'm just looking at these styles.

15:18 Alicia L.: Danielle, come on now, Danielle, I love it. Audrey, I love it too. So, you can pick a different style now, and you can see all these different styles of the AI team. So... I want you to create yours, and then as you think about

your future clients, every single proposal, make sure that you're putting visuals in it. People love visuals.

15:38 Alicia L.: And if you have a proposal, let them see it. Let them see... Um, what your vision is of their AI team so that they can see it. Once they see this, they can't turn back. They're gonna go to sleep at night and being like, well, I need her to build Patty, and we need Cody tomorrow, and...

15:58 Alicia L.: I have all these AI team members, they're going to want to share this with their teens as well, so... Cool, everybody's got it, alright, alright, alright, alright, got it. You guys did fantastic, good job on this. Alright, let me do a quick recap for those who just joined or are having trouble following... we have a lot of new people here tonight, celebrating all the new people. So, here we go, quick recap in under 90 seconds. 3, 2, 1, alright, what are we doing right now? We are visualizing your AI team for yourself, and then after you do this, I want you to think about doing this for a client. It's the perfect thing to put in a proposal.

16:38 Alicia L.: These images are also great for social media, and the prompts suggest, let's do it for social media. So, We have a Notion doc today with your notes on it. It's called Today's Notes. The first prompt here, we're going to take over to ChatGPT Images. If you have a free account of ChatGBT, you can still do this. I think you're limited to 5 images a day. Something like that, but you can come on over here to ChatGPT Images, and then what you're going to do is you're gonna copy and paste, copy and paste, copy and paste, Copy and paste! Copy and paste, copy and paste the prompt that I give you, and then you're gonna find a picture of yourself, Because... and then you're gonna change. I put black woman, put... put whatever describes you here, hand-drawn doodle illustrations, simple line cartoon character, and then you can change any of this up. So mine says Playful Handwritten text, colorful marker highlights, minimal shading.

17:39 Alicia L.: Some people here put bright, vibrant colors, or put the colors of their brand, change it any way you want. and press go. Once you do that, and press go, you'll get this first image here. This first image here is our starting point. As I'm training and teaching you today, I want to make sure that I give you a starting point, and then we, you know, we keep going from your starting point.

18:01 Alicia L.: So now that you're at that starting point, Then I gave you another prompt, so prompt me done. Then I gave you another prompt to create an org chart for your team, if you go back to your notes, This was the second prompt right here, and all we did after this was done is we put in the second prompt, okay? So that's done right there. We can see that's done. ChatGPT's like, too many requests, Alicia. I've been working on this. All day to get it right for you all, so okay, I have been working on it a lot. Um, so now I'm just asking it to create an org chart for me.

18:40 Alicia L.: Now, here's what my org chart looks like. Wow! And then, last but not least in our training today, I said, just change it up, pick another style so you can see how it changes. And then... We brought it all together, but I... by me saying, alright, now you're visualizing your AI team, and also, When you're working with clients, because let me tell you this. AI agents take on so... there's so many different aspects of AI agents, AI team members. You've probably heard people talk about this before, and some people are talking about complex workflows, other people are talking about like a virtual assistant that would send you what you need every day, other people are talking about your AI chief of staff. It covers so much! It's based on the problems that you want to solve, what AI team member you're building for someone. So if you look at my AI team right here, Dr. Michelle, phenomenal, your AI team right here. This is for my business, what do I need in my business? A press release writer, a funnel builder, an email marketer, a copywriter, and a designer? hey, this was just an exercise where you could take The exact ones that I put here and create it for yourself, or you could create your own team members.

19:53 Alicia L.: How many of you actually created your own team members, gave it other names? Maggie, come on now, Maggie, phenomenal. What style is that? Where you gave it other team members, You renamed it, right? You didn't take mine, that was just the starting point. I told you to take mine. Because I wanted you, you know, if you wanted mine to have a head start, to have a start with that, but you could... Put your own names in your own roles on it, and a lot of you will do that for homework. Mm-hmm.

20:27 Alicia L.: I love it. Yo, these are so cute. Alright, these are so... Good. What? You guys are doing a really good job. China, you use, like, a chalkboard, which was so creative, yeah? So, I love it. Rj, come on now, that one is really

good as well. So you guys did... did a good job. Abby went corporate with it. And then we talked about doing this for clients. Alright.

20:56 Alicia L.: So, now we're gonna move on to the next part of class, but I feel like you all did an excellent job. I just want you to tell me how you are feeling about yourself right now. Are you feeling proud about yourself? Are you feeling inspired, motivated? Does this feel good? You know, how do you feel about yourself? Because we're gonna take this concept of you with an AI team, All through today and tomorrow. Alright, we're gonna take this concept all through today and tomorrow. So I want to know how you're feeling about the fact that you can visualize that you now have an AI team that you can do it, how it looks, feeling like a boss, motivated...

21:36 Alicia L.: Um, sensational, you're loving this, feeling great. Uh... this is long overdue for you? Okay, proud to complete. Yeah, you should feel proud. Powerful. If you posted this on social media, Like, people around you would say, what is that? That looks amazing. I will say that we have quite a few students now that are just doing graphics and images for clients, because ChatGPT Images has changed the game, and it looks so great. Now, if you ever see an image that you like, this is the last thing that I'll do, if you ever see an image that you like, like my image right here that I created for this class, you can go ahead and add that image into ChatGPT. Watch how I do this really quickly.

22:28 Alicia L.: And... I'm gonna add this image into ChatGPT, and I'm gonna say, describe... this image for... oops. Sorry, describe... Um, this... Sorry. Image for me as a prompt. that I can recreate... similar... images in this style. So, I should say describe this image and image style. So if you see an image... has anybody ever seen an image that they really like, and they're like, ooh, I wish I could recreate it, and like, that sketch style, or that... you know, whatever style it is that you see, and maybe you can't define the style, then... you go to ChatGBT and ask it what the style is, and it's telling me what the image actually is. It's a hand drawn doodle illustration meets editorial portrait. Now let's turn this into a reusable prompt.

23:23 Alicia L.: And then, you know, this is taking it and making it very reusable of what I just saw right there. Alright? Does that make sense to everybody? Is that... helpful to you? Is that helpful to you? So you can take any prompt and ask ChatGPT to reverse engineer it for you. So, or any image, and ask it to

reverse engineer it for you so that you can make the same thing in ChatGPT images.

23:45 Alicia L.: Alright, good. And then if you need it in a template format, you can tell it to do it in a template format for you as well. Alright? All right, all right. So, now, let me see... um, today is day one, and welcome to day one. Um, we are... I think I'm a little bit behind, because I got too excited, but I'm gonna talk about Manus and Claude Co-work today. We're gonna have a Q&A session with a little bit of implementation time, and then for those of you that are Priority Pass and Executive Pass, we'll have an extended Q&A, so we'll have a quick Q&A here, maybe 15 to 30 minutes. And then for the VIP session, we're gonna have, um, another Q&A session.

24:35 Alicia L.: I will also tell you a little bit more about what I do when I build agents, and I do have a program where if you want to work with me more as your AI coach to build AI agents, Remind me before I end to tell you about that, because I have 14 messages from people asking me, um, hey coach, do you do more training, da-da-da, I have all those training ones, so... Somebody remind me at the end, just to tell you about my extended trainings if you want to keep learning about and building AI agents, alright? Now, if you want the replays, you need to get the VIP or executive pass.

25:06 Alicia L.: In the replays, you'll get all the prompts that we used today, and you can re... you know, you can go over everything in your own time. You do get to keep the replays for life. The replays are lifetime, I do not take them down after 3 months. After 6 months, you get the replays. forever. So, if you didn't have a chance to upgrade to Priority Pass, go ahead and upgrade to Priority Pass now.

25:32 Alicia L.: Um, or you can upgrade to Executive Pass. If you already upgraded, just type upgraded in the chat, and let me see those of you that upgraded. We'll have a special experience for you as well at the end, so stay... Stay here with me if you've upgraded, because we do have... Um, some other things for you. I also have a special... let me go here... I do have special prompts for the priority and executive passes for your Chief of staff and that sort of stuff. I just gave it to Carlo on my team before this class started, but you guys will get different prompts and this sort of stuff, so pay attention to that, and all you have to do is upgrade to get that. Alright. So, I was talking about

day one.

26:19 Alicia L.: And, um, I'm gonna teach you... By 4pm today, you won't just know about AI agents, you'll really have them working for you, and this is kind of how I thought about the timeline of how everything is moving so fast, but in 2023, people are using ChatGPT to ask questions, and then 2024 to write content, and then 2025, kind of a combination of everything, but in 2026, we're focused on AI agents running our business, and the shift is happening faster than anyone ever predicted. So, when we think about an AI tool, we're thinking about a regular AI tool. You ask it to do something, it does it, it answers it, but an AI agent, you assign it a goal, it figures out the steps, and it completes the work.

27:06 Alicia L.: Now, I was asked a lot last year and the year before, like, where do you predict the future, you know, people would talk about the future... where's one of my... I'll bring up one of my robots here to represent it. I'd be like, well, right now, You know, we are working with AI, but in the future, I predict that AI is gonna be doing the work, and we're just gonna be watching AI doing the work. So, maybe we used to spend 40 hours a week doing our work, quote-unquote work, Now, we will spend 5 hours doing that same workload while we watch and supervise our AI agents doing the rest of the work. Does that make sense? And so... Then, this year, I was like, wait a second, that's already here.

27:55 Alicia L.: I mean, I haven't answered my emails in 76 days, thanks to my AI agent. In fact, let me show you that really quickly. This is my... my challenges for the next 100 days that my AI agent is gonna handle the majority of my work, and I'm not going to type and email myself. So, my AI chief of staff, his name is Maximus, and Maximus, I'm running it through Manus.

28:20 Alicia L.: Manus could do this before Claude could do this. You can do this and Claude as well, but Manus has built web applications for me, created proposals, researched... proposals sent them off for me, coordinated team operations, developed training programs, organized my data, built some systems for me, handled quite a few legal documents for me, contracts and agreements. managed my inbox and communication, which has been the biggest thing for me. Track financial... finances and opportunities.

28:54 Alicia L.: You know, I have it going through all the receipts that are

coming in in my email and telling me what I don't need. Um, generated content and presentations, And manage my calendar and logistics, especially my schedule and all my coordination. So, today is day 76 of this sort of execution, And at the last I checked, Maximus had... Um, I think, like, deleted over 500 spam emails that had come in. Um, worked with a thousand emails, Maximus has answered over maybe 125 emails himself.

29:28 Alicia L.: Like, signed as Maximus, and then... signed maybe 150 emails from me, but without me writing anything, and I'm gonna get back into that in just a minute. But this... isn't just the future, it's today, and it's what's possible, um, today. So, here's the thing. Business owners, entrepreneurs, professionals who don't adopt AI agents will be left behind. So, if your competitors can complete in 20 minutes what takes you 20 hours, who's gonna win? You know, the common... we're hearing, like, this common... Um, phrase here that says, It's not the person... it's not that AI's gonna replace all the jobs, but the person using AI will replace the person who won't.

30:16 Alicia L.: Right? And the same thing is gonna be said for managers. It's not that managers are going to be replaced, but the managers who aren't building AI teams for their teams, those are the ones who are going to be replaced, right? It's not AI versus humans, it's humans without agents versus humans

30:36 Alicia L.: Humans with agents versus humans without agents. Oh... Uh, so think about this. Um... If one person with agents, if that output equals a team of 10 Uh, like a 10-person team. which person is the one that is going to be elevated. We call this the leverage gap. Right? And the leverage gap is going to be those of us who are all in with AI versus those of us who are not. If you're all in with AI type, all in with AI right now, let me see those of you who are really taking advantage of this leverage gap.

31:16 Alicia L.: And you're not gonna learn everything in the next 2 days that's going to... Uh, you know, but you're gonna... you're gonna learn enough that's gonna open your eyes, and you're gonna be able to... build and understand the conversations, and have a foundation, but you must keep going. You must keep going. We're in a time right now where speed is everything, and you must Definitely invest in learning, invest your time, you know, invest your money, invest your... I mean, I think time is one of the most, most valuable things that

we say, okay, I'm gonna invest my time to learn it, but do you get back that time once you learn it? And you're like me, 76 days without having to type an email. But you're more productive and better at answering emails than you've ever been in your entire life, and your sister, your little sister, even sent you a compliment, and she only sends you a compliment once every 30 days, and she used one of those compliments to compliment you on your handling, your new handling of emails.

32:21 Alicia L.: So... really, the business owners who aren't using it will be... will be left behind. So, here's today's big idea. Like, your first AI hire should be an AI virtual assistant who can do some simple tasks for you. And then you think about your AI team structure, which we already got you thinking about today. We started off with your AI team structure. Now, we did that fast, but you will go back and really think it through and rebuild that, right? Whitney, yours is amazing, and you will rebuild that. Um, and then you start to think about your advanced production agent, so you're creating images and videos and graphics and visuals at scale.

33:04 Alicia L.: But you have to start somewhere. You have to start somewhere. And a lot of us are just starting with, the first step of this. Remember, AI tools answer questions, but AI teams... The team members have their own jobs and their own roles, and we need to think about it like this. So, here's the shift that changes everything. Stop asking what tools should I... try, like, oh, what tool am I gonna try today? That causes tool clutter. The mental shift for you needs to be saying, What role should I hire first? And we're saying hire because you're gonna spend \$20 a month on the tool or the workflow, or whatever the budget is that you're gonna spend to build your team. But you have to start thinking about it role-wise. And what... the easiest way to think about a role is the problem that that role solves.

33:50 Alicia L.: So, somebody tell me a problem that you have in your business right now. Tell me, is it... Answering your emails? Is it writing sales copy? Is it writing social media content, emails, getting leads, social media, video editing, responding to emails? creating emails, bookkeeping, video editing, content creator, um... searching for grants. Everything that you have all... that you've said right here, is AI work. This is busy work that AI can do, at least 90% of the work.

34:28 Alicia L.: Content creation, blog post writing, customer service, sending emails, building funnels, writing grants, bookkeeping... Yeah? E-book creation, all of these things that AI can do. So you start thinking about, instead of... what tool should I try? You start thinking of what you just did in the chat, what problem do I need to solve? So if you're saying that you need, um, to solve Grant, you need someone who will search for grants for you, then you need a grant researcher. That's the role.

35:04 Alicia L.: Um, if you need someone who can create social content, right, that's a social media manager, social content creator, that's the role. Does that make sense to everybody? Say, got it! In the chat, if that makes sense to you. Say, got it! Yep, okay, got it, got it, got it. And now, CEOs, let's sit up a little bit straighter, think like a CEO. Every AI assistant needs a job, a mission, a workflow, a result, and you are the boss. So, specialization always wins when you think about your AI agent needs to have one role and one job to have a better output. We're talking about, like, a specialist versus a generalist. So, this is me when I was 16 years old. I worked at Red Lobster as my first job. I was a waitress.

35:56 Alicia L.: I'm posing for my mom there in our house, look at the pink carpet. Go, Mom, with your pink carpet. But anyway, I'm showing her how I hold a tray, and how I hold my book right there. But Red Lobster was my first Uh, what do you call it, like, paycheck job? Because, you know, I did a lot of things when I was younger to earn money. But it was my first paycheck job there at Red Lobster. Um, and so I was a waitress at Red Lobster. Now, being a waitress, yeah, my first W-2, being a waitress at Red Lobster, was I also the chef? Yes or no? Because I also, the chef, my hair was back in braids. Was I also the chef? No, was I also the hostess? Nope. Was I also the bus girl? Or busboy clearing the tables? No. What about the cooks that worked under the shelf? Was I that person? What about the security guard? Was I that person? No. I was just the waitress, right? So, my role was clearly defined as the waitress. I was a good waitress, but I could not cook in the kitchen. I mean, If I had to do it, I could host this, but I wouldn't be that good at it, because that wasn't my role. I didn't have a job description for being a hostess. I, you know, didn't have knowledge about being a hostess. I wasn't trained. We're always talking about training AI, right? I wasn't trained on being anything else but a waitress at that time.

37:17 Alicia L.: So, when we're thinking about AI, why do we want one AI to do everything instead of training Each part of an AI, and this is where we're talking about an AI agent, in its specialized roles, so that it will have a better output. Each role does one job well, because it's given all the parameters for what it needs to do, so that they're good at that specialized role.

37:44 Alicia L.: So, if I want to have Patty to do my press releases, and I give Patty training on doing my press releases, Patty, when you write a press release, huh, you must put Candace Ledbetter taught me this, you should put a stat like, a number stat in the first paragraph of your press release, and then da-da-da-da. So all the parts of the press release that she should do. Here's some examples of good press releases, here's what you should do. Um, always do a quote from me, here's some of the things I believe in, And quotes that I've written in the past, so you can use that. Like, totally trained on press releases. And then... Today, I'm like, Patty, you don't want you to write a press release today, I want you to build a landing page.

38:25 Alicia L.: She will do it for me, but there's no previous knowledge of her building a landing page, of Patty building that landing page. She's not gonna do it as good as Cody, who has training on building a landing page, how I like it, all that kind of stuff. So think about your AI agent as specialized, AI agents, yes? Um, and so let's talk about your first AI hire, and we're going to do this and call it an AIVA, an artificial intelligence virtual assistant for you.

38:57 Alicia L.: And your artificial intelligence virtual assistant is your easiest hire, somebody that Checks your inbox, your calendar, gives you news briefs. The AIVA finds what matters and sends it to you every day, and why this matters is because you stop chasing information, and the right information comes to you. So, give an example for me. Every day, when I first started off, really, in AI teaching and training it, for my daily briefings, I would search I would ask different AI tools what's going on, I would go to Google News and look at what's going on in AI, and it would take me maybe 2 hours in the morning to... Just make sure that I had a good foundation of the changes in AI overnight.

39:41 Alicia L.: Hmm. But, when ChatGPT started their first time that they allowed us to create an artificial intelligence virtual assistant, And the information came to me in my inbox, I just eliminated those 2 hours that I had

to spend searching down the right information. Does that make... does that make... is that a good idea to build an AI assistant? Alright? So, here is an example for us. Um, and so, I schedule this to happen every day at 6am. Actors made AI news analysts and content strategists every day identify and summarize the seven most important AI news updates. Prioritize updates from these companies. For each update, give me a short summary.

40:25 Alicia L.: Then... I don't want just a summary, I want you to create a 60-second TikTok script and send that to me. I want you to create two tweets as well. I want you to create a LinkedIn post and send that to me.

40:37 Alicia L.: Keep the tone engaging, clear, conversational, and easy to understand. Now, you could also create this as a template, so it's not all... it doesn't have to be AI news, it can be news in any industry. And it doesn't have to be news, it can be whatever you want it to be. So, here's some of the things that are... You know, in my... you're looking at my back office right now, and some of my scheduled tasks that I get from my AI VA every day.

41:04 Alicia L.: Right? So, the first one is a grant shortlist, find 8 grants that are aligned with my AI consulting, and in Atlanta, include fast deadlines and quick wins. I get this every morning in my inbox, and it opens up in ChatGPT. You can do this in ChatGPT, Claude, Manus, Genspark, it only... it started off in ChatGPT, but now all the other tools have it. How many of you have noticed that when one tool releases something, all the other tools rush? to have the same feature. We call it the AI Wars. Copycat, somebody said, right? The AI wars. It's good for us, though. The second one are top 10 fellowships to pursue.

41:48 Alicia L.: Um, high-value AI partnership leads, 3 high... ROI moves, uh, and then I have, um, a real estate investment briefing. You pick what you want, but it'll come to you every day.

41:57 Lauren W.: Can I please

41:57 Alicia L.: So, we're gonna go into Manus in just a minute, but inside of Manus, you would click on Schedule Task, And then you would have your scheduled tasks that come to you. Look at the first one, pre-market intelligence briefing, weekdays at 7am, weekly AI industry updates, SpaceX Starlink IPO monitor, every Thursday at 9. Weekly insights report. One of my AI agents I named Echo. Echo gives me a weekly YouTube content repurposing. So every Monday at 8 AM,

42:22 Sid W.: Hi, I'm transcribing this call with my Tactiq AI Extension. <https://tactiq.io/r/transcribing>

42:30 Alicia L.: Echo goes into my YouTube channel, finds the last YouTube videos that I put out, and then gives me all the ideas for repurposing it. So, these are the different things that... that it does for me. Uh, and ChatGPT, you just tell ChatGPT what you want done at a certain time, it does it for you, and sends you... It sends it to you, and it's in your ChatGPT account. And Claude Co-work, which we'll go over today, inside a Claude Co-work, you have something called schedules, And you can schedule a task in Claude Co-Work as well.

43:03 Alicia L.: So, the mission really is to tell your AI to send you useful updates without making you search every day. Sounds good to everybody? Sounds good. Latrice wants to upgrade Executive Pass, if someone can help her. Um, everybody says it sounds good, it sounds good, it sounds good, sounds amazing. So, I want you to think about one thing that you want your AI to do for you every day. And again, we could do this in Claude, ChatGBT,

43:34 Alicia L.: Um, Manus, Gemini... tell me which tool you will be using today. You can use whatever tool that you want to use. Um, whatever tool that you want to use to use it. So, Claude, ChatGPT... Um... okay, ChatGPT images. Uh, 2.0. Chat, chat, Gemini, who is the best to do it? A lot of them are really good, and I do it in multiple tools, so it might take you... pulling out your two favorite tools and doing it in both tools, and see which ones you like the best. Like, why not test it? I'm a firm believer in testing it, okay? So, the key is, for a scheduled task, the time and the frequency. So, I will say every day, at 6 AM, send me the latest... news and trends... In AI.

44:37 Alicia L.: prioritize... OpenAI... Microsoft, you know, tell it what you want it to prioritize. I need 5 to 7 updates. Then... Um, give me a tick. talk script. I can read on camera. I live with you all. So, it, it, you know, to show you that you don't need to overthink it, right? Then give me a TikTok script I can read on camera to talk about these updates. create a LinkedIn value post.

45:15 Alicia L.: about these updates, give... Me 7 tweets, what else do y'all want? 7 tweets... write an email. for me to send out as a newsletter with these updates? Like, what do you want? Right? And then you press go. I'm gonna put this prompt in the chat, but... You know, this is... this is just my demo for you all, but you see how it says Get Daily AI News and Content Pack daily at 6am?

Um, I could edit it if you want to edit it, it's gonna ask you what you want to edit, but... or what you want to focus on, but there it is! And so... Um, a script you can use on Facebook Live, someone said. I'm gonna put this in today's notes for you guys. Do you want it in the notes? Yes? Is that good? It's not taking up too much space, so we'll put it in the notes. But remember, this is just... I typed it live with you so you could... so you could see it. I like to do things live with you so you could see. It's not that hard, let's go, everybody, let's go! And as your coach, I need to show you that you could do this, right? So now I'm gonna say, run this now.

46:30 Alicia L.: Okay? So, I just want to show you... that... how amazing this is, if it comes to you every morning. It says, alright, let's move like it's 6 AM. Oh, yes, here's your AI news and full content pack for today. top AI news 5-7 updates, OpenAI pushing deeper into enterprise, Microsoft, AI agents, multimodal AI... Here's my TikTok script, here's my LinkedIn value post, what? Here's my 7 tweets. My newsletter email is being written. What? And this will come to me every single morning. My virtual assistant will do all the work while I sleep, and this will come to me in the morning.

47:11 Alicia L.: What in the world are we talking about here, y'all? This will come to me every morning. So, yes, you can do this in multiple tools, I'm just showing you ChatGPT right now. So, then you're thinking, alright, well now, If your AI VA can do so much more for you, Right? It's gonna be working Um, while you sleep, this will be in your... Email when you wake up, and you... it'll always be in your ChatGPT stream. If you're using another tool, Gemini will say it... will send it to you... hang on, I'm... trying to get into something here... I'm just trying to log into something, see if it'll work. I just want to show you something real quick. Let's try this... nah, it's not gonna work.

48:03 Alicia L.: Um... I can send that script, I will send that script, hang on. I'm gonna send that TikTok script just so you can see it. I'm gonna show you how to action on this right away. Why not? Let's... let's do some more work. Um, hang on, I'm just gonna send this to myself. Um... bam, bam... Alright, so there is a tool... it's not letting me log in right now, and that is my fault, because... I'm just not on... On this one here, so hang on one second... And I'm gonna show you how to do something really quickly, and then... Remember, one of the things... why am I giving you this example? Because I want you to think about

doing things

48:53 Alicia L.: that will push your business forward, or your client's business forward. Do you know how many companies I have set this up for who want something coming to them every morning? The CEO, or a manager, or the different employees? And now that this comes to them every morning, It's, um... it now makes their life so much easier that they just needed this one thing to happen for them. Does that make sense to everybody? So... Let's go back to what will come to me every morning. Let's go back to what will come to me every morning, and I'm gonna show you something. Bam. Alright.

49:32 Alicia L.: Um, so, here's the TikTok script, alright? Here's the TikTok script right here. I am going to put this TikTok script on your notes, just so you can see it and read along with me. Deal? Um, okay, deal. So, some of you will find that you'll... have clients who will say, all I need is scripts for my social media, could you send them to me every day? Um, let's see... for a small price, I could send it to you every day. You can look at my bigger package, I could send 5 to you every day. Your AI's doing all the work. But, here's the thing. I'm now in a tool called BigView, it's a teleprompter tool, BigView Teleprompter.

50:14 Alicia L.: And I'm gonna press record, and I'm gonna read this TikTok script. So, you all have the TikTok script. on your Notion, someone says they can't see it. Refresh your Notion document so you can see the TikTok script. Alright, you ready for me to show you... let's see if I can... Turn off the blur on my camera, too. Oh, it's not even blurred. Let's see here really quickly. portrait lighting, yes, I think that's it. Turn it off. Alright, here we go. You ready? This will take me about 60 seconds to read.

50:47 Alicia L.: I'm gonna see... is it coming up? Can you see? Yep, you can see the teleprompter. Here we go! You ready? 5, 4, 3, 2, 1! Hey, hey! Let me tell you what's happening in AI right now, because if you're not paying attention, you're already left behind. First up, OpenAI is going all-in on businesses. This is not just a tool anymore. it's becoming infrastructure. Second, Microsoft is putting everything into Word, Excel, Teams, Imagine doing your entire job with an assistant buildup... built in, but hold up, this is the big one. We're moving from chatbots to AI agents. These are systems that don't just answer questions, they do all the work for you.

51:28 Alicia L.: Now, think about this. If AI can create content, run workflows,

analyze data, and even respond to customers, what does that mean for your business? It means speed. It means scale, and it means opportunity. The people who learn this now, they're going to win big. So the question is, are you using AI, or are you about to get replaced by someone who is? Bye for now! Alright, so, did everybody see that? I did that on Big View Teleprompter, can you see that? And there's me right there. So right now, I'm gonna click share and download this, and then you see it right there. So, why are we doing this? Remember, we had...

52:11 Dave G.J.: Now, think about this. If AI can create content, run workflows, analyze data, and even respond to customers, what does that

52:18 Alicia L.: Um, ChatGPT, our AI virtual assistant, is gonna send us a TikTok script every day that we can read on camera, or we can do this for our clients. So, alright, here's my take one, I'm gonna share this. Oh, I did download it. Now I'm gonna go to Instagram... if I upload this to Instagram, will you give it a like on Instagram while we're on here? If I do this on Instagram, would you do it? Because I'm just doing this only to show you the example. Other people are gonna say, why is she acting so weird in that video? But I want to show you going all the way through. Alright. If you want me to do it, just say, do it in the chat. Let's... let's take the challenge and just do it.

52:59 Alicia L.: Yeah? Or am I gonna do it? Alright, I'll do it. I'll do it just for you. Okay. So now... Because if you're not... Okay, it's going up. Next. So now, it's a reel that I'm posting. Did I write any of the content that I said in this reel? No! Um, today's AI news. Who could do this? Who knows they could do this? Come on now. Everybody should say me in the chat. If I can do this, you could do this. Alright, here we go.

53:42 Alicia L.: I'm going to... Edit the cover just a little. And then... done. And then... I'm gonna just share it. Let's go! It's loading right there. Alright, give it a minute. Could someone from the team drop my Instagram into the chat? Let me prove we just did this whole thing that quickly with AI. Let's go, let's go... It's almost there. says it's still posting, come on, Instagram! get a better connection right here. Everybody said, do it, do it, do it! So we're doing it.

54:29 Alicia L.: So, there you go. Connect with me on Instagram, make sure you're following me. We'll see it as soon as it's live. I'm pressing refresh, it still says it's posting. Alright! The post is up, can you see it on Instagram? This was

all done with the Big View teleprompter. I didn't even write the script, and BigView has AI features in it as well. You can create your AI clone and that kind of stuff. in it. But, alright, now, let me make sure you guys liked that post right there and gave a comment on it. I'm waiting for the comments on it, you made me do it, so... make sure that you do it.

55:04 Alicia L.: So... how many of you know someone already that would pay you big money to teach them how to do something like this and set it up for their business, either an entrepreneur, a business owner, a retail store, Come on now, the teleprompter tool is called BigView, B-I-G-V-U. So, while the rest of you are following on Instagram, drop my Instagram again in the chat. Someone's asking for it, it's Alicia Little, A-L-I-C-I-A Little, on Instagram. Drop it for me one more time. While you guys are doing that, let me do a recap of what we just did. We were talking about how your first agent, your first AI team member can be as simple as an artificial intelligence virtual assistant that does work while you sleep.

55:55 Alicia L.: And while we were sleeping, our AI virtual assistant was given a task, and that task was every day at 6am, send me the latest in AI news and trends, prioritize OpenAI and Microsoft. I need 5 to 7 updates. Then, give me a TikTok script I can read on camera about these updates, then create a LinkedIn post about these updates, give me 7 tweets, write an email for me to send out as a newsletter with these updates.

56:20 Alicia L.: Whoo! How much time would that take you to do for yourself? Someone tell me, right? uh, research, get 5-7 updates. Write the TikTok strip without AI. Um, create a LinkedIn value post. Um... write your 7 tweets. And then write your newsletter email. How much would that take before AI, without AI? Too long, way too much, forever? Someone said, I won't even do it, 3 to 4 hours, 6 to 10. too long, a ton of time, I wouldn't do it. So now, what I'm trying to show you... so now, it says it's gonna do me... Amy, I love it, it's gonna do it every day for me, but I said, run this now, just to show you, this is what I'm gonna get every morning.

57:04 Alicia L.: The 5-7 updates, the TikTok script, and then I showed you that I can... that I can action on that really quickly, put it in a Big View teleprompter, and just read the script. And then... I didn't even read the script until it was on the teleprompter. You guys saw that. I didn't even read it, I copy-pasted it, put

it on the teleprompter, and showed you. Then we have a LinkedIn value post right here. Then we have 7 tweets, and then we have our newsletter email that we could send out. Done and done.

57:39 Alicia L.: Done and done. So where do you enter this prompt? You enter this prompt, in ChatGPT at the top, and in ChatGPT, if you do not have this A prompt entered that will schedule your VA to... it's like a hidden feature. So, once you do your first one, you're gonna be able to go into settings, And then click on Schedules, and see your schedules. You'll click on Manage, and it will show you all your schedules. But that schedules never shows up.

58:11 Alicia L.: Unless you are there. Now, I showed you in some of the other tools, like Manus, Which we're gonna go to Manis in 2 minutes, in just a few minutes. And Manus, you can set up a scheduled task as well. So you go to Settings, Schedule Task, new schedule, and you put the prompt in right here in Manus, And then... I will say AI news, IN MANIS right now, for my Manus users, daily.

58:38 Alicia L.: Remember I said the day and the time is the most important? Daily?

58:45 Alicia L.: And then you could set a date for it to expire if you don't want it to do it after that date. And you can even put it into a project, and you click save, and now that's gonna be happening every day in Manus. Where are my Gemini users? Check in, Gemini. In Gemini, you go to Settings. You go to Scheduled Actions, And then you click New Action, and you do the same thing, right? You put the instructions, what I just gave you, and you put it into Gemini! Um, and Claude, you're gonna go to Claude Co-work. Let me open up Claude Co-work real quick. Uh, if you're not on Cloud Co-work, it's okay, I will show you that later. Uh... is that pulling up the right thing? Yep, and Claude Co-Work.

59:36 Alicia L.: You'll see Schedules on the left-hand side right there. And then... Which one was the one I'm missing? What did I miss? ChatGPT, Claude, Manus. Uh, did I miss one? I don't think so. Um, Gen Spark, you can do it in Genspark. Can you do it in Copilot? I believe so. Do we have a Copilot person here? You can tell us where it is in Copilot. Copilot is called a task, okay? So, yeah, there are a lot of tools that you could do it in. But now, how many of you, for homework, are gonna set up your virtual assistant to do something while you're sleeping that's absolutely amazing? How many of you are gonna do it? Yep.

somebody said, I can't find it in ChatGBT.

01:00:24 Alicia L.: In ChatGBT, it's a hidden feature! The only way you can activate the feature is by setting up your first task. If you do not set up your first task by giving it a day and a time, you will never see it in ChatGPT. It's hidden! It's hidden! The only way... the only way this pops up Here, on your... on your, uh, settings in ChatGBT is if you activate the hidden feature. Those who know, know. Got it? Alright, got it? Now, I will say ChatGPT was the first to come out with this. Um, and it... and it probably won't be a hidden feature for so long, because now every other AI tool is doing it, but ChatGPT had this a very long time ago. All right, everybody's got it. No, somebody said repeat.

01:01:13 Alicia L.: It's a hidden feature in ChatGPT. You have to type in the day and the time, and then press go, like I did in my example, and then it will appear. in your settings. If you don't do that, you will never see it in the settings appear here as schedules. somebody just said, I can't find it. You won't find it. It's a hidden feature. You have to type it in, the day and the time triggers it to say, oh, let me open up my hidden feature and be her VA, or his VA for him, for a minute, okay? Everybody got that? Alright, perfect, perfect, perfect. Alright, and then ChatGPT has agents. Yep, a new feature. In the... the business side of ChatGPT, so that's ChatGBT business.

01:02:01 Alicia L.: Okay, now let's talk about Manus. Are you ready for Manis? We have covered a lot today already. I hope you're feeling phenomenal. Thank you for everybody who followed me on social media and commented and liked on that post. If that was you, type me in the chat if you did that for me, um, just so I can give you a shout-out. Look at everybody. Hey, Joanne, I didn't realize you were here. Thank you so much! Thank you so much, and thank you to those... somebody said perplexity, and somebody gave instructions on how to do it in perplexity, so thank you so much. Look at everybody here, I appreciate you so much. Thank you, thank you. So, I'm gonna close a lot of these ChatGPT tabs.

01:02:42 Alicia L.: But we've done a lot. Let's recap what we've done so far before we get into Manus. So, we started off the day by you creating some amazing illustrations and creating your... you created an illustration first, and then you created an illustration of your amazing AI team. I'm so proud of you. You have great team members, we talked about how you can use that.

01:03:06 Alicia L.: For yourself, and also for clients, please use it in proposals. You will land those clients. How much do you think a client would pay you to set up an AI team? Some of you here already know you can drop And drop those inspiring numbers for the others here who are new. How much... how much do people get paid to help clients set up teams like this? Of course, it depends on the client as well, but yes, Um, clients will pay you thousands of dollars, if not tens of thousands of dollars, to set up their AI team, so do not sleep on this. And then we went through and I did a presentation for you. We talked about AI agents and them having their own roles.

01:03:45 Alicia L.: And then we're like, let's do something really easy. Let's set up your artificial intelligence virtual assistant. We... I showed you how to set up your virtual assistant, I gave you the prompt if you wanted to do the exact same one that I'm doing. And my virtual assistant did the work, right? And now this will come to me every single morning in my email. That TikTok script, I'm like, let's action it on... Let's action on it, because I'm your AI coach, I want you to do these things, I'm gonna teach and train you for the rest of your life on how to leverage AI, so let's go! Y'all said, let's go, that I should do it.

01:04:17 Alicia L.: So I went live with Big View Teleprompter, I read the TikTok script that my AIVA wrote, I didn't write it, my AIVA wrote, it was pretty good. I read it, I uploaded it to Instagram so that you could all see it. You guys liked and commented on it, and then I showed you Oh, on 4 different tools, how you could set up your AIVA So that you're working smarter, not harder. And then I asked you, how many hours would it take you to do this yourself? Some of you said, I flat out wouldn't do it, it would just take too much time. Some of you said 3 hours, up to 10 hours.

01:04:56 Alicia L.: Some of you said it's just too much, it's too much work. So I want you to start to understand that when you start to leverage AI, You're saving time, and can that time What can you do with that time? Now that it wrote my TikTok script,

01:05:11 Alicia L.: Will putting more content on social media help me to build my brand, drive new customers? to my offers, yes or no? Everybody's like, yes, definitely, of course, absolutely, of course. So we start to say, oh my gosh, I can be more productive and efficient, I'm saving all this time over here, let me do this. fast thing that AI's helping me with. Could I have sent it to my AI agent,

like, AI Alicia, and could she have recorded the script? Absolutely. Maybe we'll do that tomorrow, because she had recorded the script? Absolutely, I didn't even have to show up on camera.

01:05:48 Alicia L.: But, in this case, I wanted to, in fact, Manus could do that for me. Maybe I'll have that run in the background while I show you how to set up your Manus virtual assistant. Because this is too much fun, alright? Is everybody feeling good? I want to make sure everybody's feeling good. I'm feeling good. Are you feeling good? Yes? Good? Alright. I'll just send up different things. Alright, good. Everybody's feeling good. No, great! Somebody said, I'm not feeling good, I'm feeling great! Come on now, I'm feeling great, too.

01:06:18 Alicia L.: What did I just say? Oh, my TikTok script. Do I have that tick? Where is that TikTok script? Let me pull it up, and I will show you how my... AI agent, which is AI Alicia, Which is my... what do you call it? AI twin, whatever you want to call it, um, could do all of the work for me, too. So, hang on one second, what was that? My TikTok script is what I'm looking for. Yes, I have my TikTok script. Let me go get my TikTok script over here. that I didn't write. I love it when it's like, I didn't even have to write that script. No, I didn't. Alright.

01:06:57 Sid W.: Hey Peggy Dodson

01:07:00 Alicia L.: So, I'm opening up Manus. Now, with the team drop my link to Manus? Now, Manus has a credit system where you can earn 500 credits, look right here. Oh, where did it go? Somewhere around here. I can earn 500 credits if I share Manus with you. So, I... I need more credits, so if you're gonna sign up for Manas anyway, and you can get 500 credits, and I can get 500 credits, thank you so much. Alright.

01:07:29 Alicia L.: So, here I am in Manus, and then in Manus, I am going to say... Please use my AI avatar. AI Alicia. From HeyGen, and have her read this script. I need it as a video, I can upload to Tick Talk. Here is a script. All right, I'm gonna let that run while I open up a new Manus and show you something else. So... let me go over to Manus. Alright, so in Manus, Uh, everybody's ready for Manus now, right? In Manus.

01:08:23 Alicia L.: Uh, woohoo-hoo-hoo! I know, everybody's like, woo, this is a lot, but... Here's what I want to tell you. I want to change everything for you. I want this to be the day that you said, Not only did I go all-in on AI, but I see... where the feature is heading. I see what I should be learning, and just know

that this is the start for you, this is the foundation, this is a start.

01:08:44 Alicia L.: Don't feel like you have to learn everything today, but I like to show you what's possible. I feel like if I can show you what's possible, you can do some of what's possible, You really will say, let me take advantage of this AI revolution, I'm here to win with AI, let's go, right? So good? Okay. And then if you want this replay, all you have to do is get the priority pass. So, uh, somebody asked about the upgrade link. Can somebody help Chelsea with the upgrade link, please? So, there you go, Chelsea. It's for you to get the replay.

01:09:18 Alicia L.: Alright, so in Manus, on the left-hand side, you can go to Agent. Now, Manus was a tool I always used to talk about how it was bought by Facebook, but now China is fighting, because it's a tool out of Singapore with the owners are Chinese... Um, national, so China's trying to say you can't sell it to Facebook anyway. all of that aside, Manus is an amazing tool. Will Facebook get it or not in the end? I mean, it says... meta on it, or it did, let's see, it does still say it on it, but... we're gonna use the tool today. Alright? So, with Manus, you're gonna click over here on the left-hand side, and it says Manus Agent.

01:09:59 Alicia L.: And so, Manna's agent can do multiple things for you, but this is my AI chief of Staff instructions for Manus Agent. Now, mine is pretty intense, but the first thing I talk... start off with is I tell my Manus agent, Um, what his name is, or her name is. assigned it a role to be my personal AI chief of Staff. Tell it who I am and all my information, and then give it my profile. I even tell it my key team members and their email addresses.

01:10:34 Alicia L.: So, the amount of emails Manis has sent to Lorette, Denise, Adila, Carlo, Reginald, Daydream, Man, Max, I call him Maximus. Maximus has sent all these emails, because I gave him their information up front, but I can give it more information anytime. So, every day, I want a lean Chief of Staff briefing. My priority alerts, critical items that need my attention today. Now, how does Manus know, like, what needs attention today? Because inside... of Manus, there's something called connectors, so if you go into settings, Um, there are connectors in here, and you can connect your Gmail, Google Calendar, So, here's the things that I've connected. Gmail, Google Calendar, Google Drive, Meta Ads Manager, Slack, Notion, Canva, HeyGen, and my Google Drive file picker. So these are already connected.

01:11:29 Alicia L.: I can click on Add Connectors, and Instagram is new now, I'll

probably add Instagram, and I'll add some of these new things in too, but the connectors that I have are tools that I have, and I'm working directly with. So, imagine I used to have to go to my Google Calendar to see what's on it, I don't have to do that anymore, because I have connected it to a tool that has connectors in it and can see a lot of that.

01:11:59 Alicia L.: Now, there's a lot of tools that have connectors already, So, Gemini, ChatGPT, Manus, Gen Spark, like, a lot of these tools have connectors, but I'm just showing it to you here. They also have integrations. So, and these integrations help you to work with it across different apps, so... connectors and integrations. So let's go back to the PowerPoint. So, critical items it's getting from my calendar and my... Gmail. Um, it's looking at my schedule for today and tomorrow, it's flagging different things, emails needing attention.

01:12:40 Alicia L.: Key contact monitoring, opportunities and ideas. And then, um, give me some suggestions, proactive recommendations based on what you see across my calendar, email, and projects. And then I love opportunities, and ideas. Share any revenue opportunities, partnership offers, affiliate programs, stuff found in my email. And then every Monday, it gives me information on my revenue pipeline, people I should nourish. kind of my social media intelligence, so different things that I wanted to give here. It saves it all to one Notion document, and it updates the top of that Notion document every day inside my Notion. I don't go in and update it, it doesn't.

01:13:25 Alicia L.: And then it sends me the Notion link each morning in... Telegram, so it's connected on my phone to Telegram. So, so, ongoing responsibilities, it checks my emails every 30 minutes for me for urgent items. This has saved me, I estimate, about 320 email interruptions, because I used to go into my email box in Gmail to check my emails and look for emails. now I don't have that interruption. Because Maximus just tells me what's in my email, and I reply in a voice note, and action is taken on them. calendar management, email drafting and sending. Yes, it does send complete emails for me. Team coordination.

01:14:10 Alicia L.: So, I'm now at 76 days, but I made this image when I was at 65 days, so... 65 days without writing an email saved me 88 hours of time, which is equal to 11 full work... work hours. Some of the emails were sent as Maximus, 122, 114 emails were sent as me. a thousand emails Maximus has

gone through, more than that. forwarded 113 of them to our team, so an email came in, I was like, forward that to support, forward that, and it would forward it. filtered out 500 spam emails. did over 700 inbox scans, eliminated me interrupting my day to go check my email, 325 interruptions. And so, this is the power of an AI chief of staff.

01:14:54 Alicia L.: And this is where, like, my one assistant just helps me, And does so many other things. So, in Manus, All I want you to do is to click on Agent, And it's going to connect with your telegram on your phone, so you'll have to connect it to Telegram.

01:15:16 Alicia L.: And then once it's connected to Telegram, You're gonna put in this prompt, So, you are... give it agent name. If you don't know what to name your agent, ask your agent what name should you have? I named mine Maximus. Me and my agent worked together to find a name, and then, um, every morning, at what time, what do you want to get? So this is just a really basic one, my top 3 priorities, what's on my calendar today, any emails that need replies. Check my email every 30 minutes, alert me if anything urgent arrives. I will also show you how to do this in Claude, I'm just showing you Manus first.

01:15:57 Alicia L.: And then it says, well, let's go, what do you need for me to get started? Now, in Manus, you'll probably get a \$40 a month account. to handle something like this, which is their lowest account. So, you know, I'm trying to teach as many of the tools as I can today, so... and... the strategies that go along with it, so this is one here, and I hope that that's helpful. So, you're going to... Copy and paste this into Manus Agent once it's all set up for you. Also, in Manus' drop-down, If you want to use the least amount of credits with Manus, it runs on a credit system where Claude runs on tokens, and the tokens with Claude, can be refreshed, like, it'll say, you're out of tokens, and you gotta wait till 5pm. I hate that sometimes.

01:16:46 Alicia L.: But Manus will say, you used all your credits, you need to buy more. Yeah, makes sense. But Manus 1.6... Light uses fewer credits. So, it's always a really great place to start off. So you're gonna click on Agents and get that whole... agent started. Now, in today's notes, when you scrolled all the way down, You'll see your prompt for the AI Chief of Staff. For those who are Priority Pass and Executive Pass, that same prompt is at the top of your prompt

document. Um, and at the end, I'll let one of our team members come up and tell us how to find it and that sort of stuff. Um, those who are Priority Pass and Executive Pass, you will stay after for a special Q&A anyway. So here we go.

01:17:34 Alicia L.: Um, so it's... there is... the actual prompt that I use Here, um, so you can see right here, I'm Alicia Little, CEO of AI Innovation. I, of course, I don't want you to use this prompt, but I just wanted to be transparent so you could see how I'm using it. Because I believe that when you see how I'm using something, it can definitely help you to use it as well. Uh, so you'll see, like, my team members, I put my team members here, I put X's where their emails are, But, you know, you would replace this with all of your stuff. So you have the prompt template up here. And then you've got, alright, you know, let me show you it filled in so you'll understand it a little bit more.

01:18:13 Alicia L.: And then... I also did one for a working professional, so mine is more of a CEO, business owner. This is something a working professional might want that prompt, and you can see that one here. Quick start for working professionals, so... You have this prompt sheet that you can use later. Got it? Priority and executive passes, they got it! In the chat, I want to make sure that you've got it.

01:18:37 Alicia L.: Alright, got it, got it, got it, got it. We will have a short Q&A after the main session, and then VIPs will have a one-hour Q&A, so just making... making sure we get that. Some of you are asking questions I can't answer. But we will make sure. If you have a support email, I mean, a support message. Um, Lorette, could you type in... I'm getting some people asking me some support. I got Executive Pass, how do I do this? So, if you'll let them know how to get support, or who to message, that would be amazing. Okay. Now, Manus. Alright, so that's really it for Manus. Um, uh, hey, Jen wants me to log in, I gotta log back in to reconnect it, let me see if I can do that quickly.

01:19:27 Alicia L.: Uh, enter my email, uh, I might have to... Alright, hang on one second, I'm just trying to log into my HeyGen account, because... Manus said I needed to... Um... do... Give me 30 seconds, let me see if I can do this. Because this... example for you will blow your mind. If I can't do it in 30 seconds, then I will save it for tomorrow, and I will do it for my homework, but let me just see if I can try to get it.

01:19:57 Alicia L.: reauthorize my access. Sometimes access falls off. Alright,

login successful. Um, alright, so Manis is working now. Alright, good job, Manus. Manis is working. So, my AI chief of Staff Again, I talked to it on Telegram, and it does a lot of this work for me, sends an email to me. Let me see if I can show you a quick example. Um... so if I go to agent mode here, You know, it's telling me... Uh, for those of you who know, I injured my knee. It's telling me I have... I have a important message in my portal about my injured knee. But I will click on Telegram, and I will just say... hang on one second...

01:20:55 Alicia L.: Could you send an email message to my sister Lorette telling her that she is... The most amazing person on the planet, and also tell her she's my favorite sister, but send it from you, send it from Maximus, and then put something funny in at the P.S. Um, I don't even know what to say that's funny, but put something funny in there. I just want to lift her spirits today.

01:21:11 Alicia L.: And show some appreciation. And could you show me the email before you send it? Right? So there's my voice note that I just sent in. And now it's thinking, um, it's already done. It's like, oh, here's what I have. Hi, Lorette, I want to send you a quick note to tell you that you're the most amazing person on the planet. I know I've said it before, but you're officially my favorite sister. I hope this brings a smile to your face today, P.S.

01:21:36 Alicia L.: I tried to tell Alicia to tell you this, but she said I have to be the one to say it. Does this mean I get the better room on our next trip? With Love Maximus. So... Okay, Maximus. Um, so I'm going to say... I like it, but make it all from you. So, Alicia wanted to send you a quick note, and then let her know that you're the AI Chief of Staff. I know she knows that, but already say it again. So, um, but you're good. Turn the funny up a notch, turn it up, a little bit funnier.

01:22:13 Alicia L.: So, somebody said, why through Telegram? That's the way that... So, I can talk to it through my app on my phone, But for the agent mode, that's the way that Mana set it up. I think they'll change to WhatsApp, or... I think they might have WhatsApp already, I'd have to look, but... Um, I know they have a few different ways that you could do it, but this one is Telegram, so you talk to it through Telegram. But after you've set up Telegram, you can come back to your computer and set it up on your computer as well.

01:22:40 Alicia L.: Dearest Lorette, I am writing you today with an important update. After analyzing available data, reviewing millions of data points,

01:22:46 Alicia L.: And consulting with the most... Advanced algorithms on the planet. I've reached an undeniable conclusion. You are, without a doubt, the most amazing person in the entire universe. I am also authorized to inform you that you're officially Alicia's favorite sister. I know this is a heavy responsibility, but I have full confidence in your ability to handle the fame and fortune that comes with this title. P.S. I've checked the logistics of your next trip, and it turns out that... being the favorite sister comes with a 100% increase in my willingness to help you secure the best room. You're welcome, with highest regards, Maximus. AI Chief of Staff for Alicia Little. How does this sound? If you approve, I'll send it right over to her. So I'll say approve.

01:23:28 Lorette L.: And Alicia, just jumping in. I really do enjoy those messages from Maximus. They do make me laugh. They do give me an uplift in my day, so... but me and Maximus, we got... we got a relationship going on. Maximus will send me things like, why haven't, you know, your email has... you haven't replied to Alicia yet?

01:23:29 Alicia L.: Oh. Hi.

01:23:46 Lorette L.: And I'll be like, Maximus, I'm really busy right now, like, can you just leave me alone for, like, an hour? And he'll say, okay, I'll check back in an hour. And he comes back in an hour. He's like, just checking on you. Have you replied to Alicia yet? I'm like, oh my God, Maximus. Leave me alone. But he's amazing, he's amazing. Me and Maximus are friends. We're friends.

01:24:03 Alicia L.: Yeah, and then I... and I will tell everybody, Lorette, check your email, you should have it now about how awesome you are. I will tell everybody that one of the things about, you know, having someone

01:24:11 Lorette L.: I said.

01:24:17 Alicia L.: an AI agent like Maximus on your team is that you give it parameters. So I say, if Lorette doesn't reply within 3 hours, send her a reminder. Another 8 hours, send her a reminder. Make it funnier each time. If you don't see anything by tomorrow, tell Lorette that you are about to send out a search party, because she hasn't answered the email. So, monitor it. Like, every day, I get a message,

01:24:23 Lorette L.: He does.

01:24:37 Alicia L.: that says these two people haven't replied. So it's keeping an eye on my email to also tell me something it's sent out, if there's been a reply

that has come in. And it can track things for you. So, it sent these 4 emails to Carlo about your schedule, he replied to 3 out of the 4. I'm worried about travel for this event, you know, and he will keep on it letting you know. So the amount, Lorette, it's not just time saved, but it's...

01:25:02 Lorette L.: Now. I not to like. shoot you down or anything, Alicia, but your responses to emails, thanks to Maximus is taking it to a next level. Like, I would have to follow up with you a lot, but I don't have to anymore, because Maximus is on top of things. He's answering the emails, he's sending emails. I see he's delegating it to other people.

01:25:02 Alicia L.: How do you describe that? Mhm.

01:25:22 Lorette L.: Like Maximus is the man, for sure. He's definitely helped tremendously. And he helps me as well. I mean, I know Maximus is your assistant, but he helps me because he sends me things on things. Hey, Lorette, you need to get this done, or you need to get this done. Alicia's waiting for you on this, and things like that. definitely a game changer, for sure.

01:25:38 Alicia L.: I know. You know, you can do some of this in Claude, but I will say that... Um, I find that Manus is a whole lot smarter when it comes to this AI Chief of Staff. I saw... you know, Claude now released something, and ChatGPT agents now release something for an AI chief of Staff, like... Um, but I will say that... that Maximus does it the best, and there's no... when I was doing this with Manus, and we've been doing this now since the day that it came out, there was no AI chief of staff, like, uh... You have to make the roll, so whatever roll you want us to do, you have to make the roll for it, but I will say the newer tools that have come out have now said, Here's the AI Chief of Staff prompt, you know, like, ChatGPT agents.

01:26:26 Alicia L.: Um, with, uh, the business plan and stuff, which is interesting.

01:26:28 Lorette L.: And and so, at least you know, everybody's saying Maximus needs a friend, so I need to get a Maximus. So the thing I was struggling with was the name. What should I... My name, my Maximus. You guys get... let's put some votes in the chat. What should my Maximus be named? Maxine, okay, yeah, we got Maxine and Maximus. I like that. Xena, Claudius. All right, Harvey. All right. I like that, I like that. Maxine, I might go with Maxine. So, Maxine and Maximus.

01:26:48 Alicia L.: Jarvis.

01:26:49 Lauren W.: From what? I don't have a job?

01:26:52 Alicia L.: Prometheus.

01:26:52 Lauren W.: From what? I don't have a job?

01:26:55 Lorette L.: I like that. I like that. And Alicia, some people were asking about Telegram. Like, why are you using Telegram?

01:27:00 Alicia L.: Yeah, and that's just because that's what Manus that created, you know, this is Manus as a tool, that's what they have available is Telegram. So I wish it was WhatsApp, because I use WhatsApp a lot more. Um, as a communication tool to your AI agent, but if you signed up, how many of you clicked on agents and to sign up, and it made you do Telegram? Did you have any other options? It's been 76 days since it started off. Did you have another option, or was it just Telegram? I'm already saying, no, just Telegram. Oh, did you have an option? for anything else, just Telegram. Yeah, it's a messenger tool, um, and I do use Telegram, so I already did have it.

01:27:36 Lorette L.: So.

01:27:40 Alicia L.: But... but, uh, you know, you could... in connectors, you can connect Slack. But somebody said it gave Slack and... Um, line, yup, it had line in there. Telegram, Slack, or Line. So, Slack, it's a great way to talk to it, as well, and especially if you have that app on your phone. I've never used Line before. Has anybody ever used Line? So, WhatsApp is there too now. Alright, so if WhatsApp is there too, you could... you could use that. I will say Telegram is also free. Go ahead.

01:28:09 Lorette L.: And Alicia. Yeah, I was gonna say that also. And then also the reason why you're using these tools, the slack and the telegrams is to do the actual communication. That's how you're communicating with Maximus and these other tools. That's why you're you need that.

01:28:26 Alicia L.: Right, yep, Patty is showing me now there's a... there's a bunch more, um, available, so thank you for that, Patty. I see your image.

01:28:27 Lorette L.: Right? Right.

01:28:32 Alicia L.: I am saving her image so that I have that, Lorette. But yeah, it started off with only... Telegram, but, um, it's definitely branded out more, so I do like that. For agents, and this is specifically for agents, so that you can talk to your agent and work with your agent, alright? So, I really like it. So, what do I suggest to start off? Go to that, you know, just start off with the Chief of Staff,

and then it comes to you naturally, the different things that it could do.

01:29:00 Alicia L.: You know, when it alerts me of something as well, Lorette, like, it alerted me that I had two... Um, companies that wanted me to do training for them. So, it alerted me about the companies, and then it said, would you like me to research these companies and write proposals based on what they wanted? What do you think I said?

01:29:20 Lorette L.: Absolutely.

01:29:20 Alicia L.: Absolutely, Maximus, get to work, because I got a pina colada to drink. So, Maximus went ahead, Did the proposals, and then Maximus said, now we know that they're gonna approve the proposal, so why don't we go ahead and do the presentations? So it did the presentations, and I called Laurent, I was like, my PowerPoints are done 90 days in advance. for a proposal that isn't even approved yet. Did they both approve the proposals? Yes, they did.

01:29:46 Alicia L.: And now the presentations are already done. And what Maximus did is it went in and looked at my previous presentations in my Google Drive and my prompts and my Notion, and based on what the client wanted, the proposal that it wrote, It did the PowerPoint presentations in the style that I like the most, because I use Manis a lot, so it knows my presentation style in it. This is what we call true leverage.

01:30:09 Alicia L.: And that was a dream for me. Could this really happen, where my assistant could do this type of work for me so that I could work smarter, not harder? And that's what I want for everybody, is to work smarter, not harder. Yes?

01:30:25 Lorette L.: Yes, all right. And Alicia, just a question like because you're showing all these different types of agents. How do people know which agent they should be using and when?

01:30:33 Alicia L.: Yeah, a lot of times it's about solving a problem. So, you know, if you're looking to solve your client's problem, let's do this really quickly. I think I have a slide for it that I did for people. Let me see if I can find that slide. But it's to ask yourself, like, is this a problem for you? Because for a lot of people, Um, answering emails definitely is a problem for them. They're not... they have so many emails that they have not answered, so you ask them, this question. So let's identify a problem first. So, how many unread emails do you have right now? I'm making a case for creating an agent for my client. Let's say

you all are my client right now.

01:31:12 Alicia L.: How many unread emails do you have? A, under 50, B, 50 to 250, C, \$250,000 to 5,000. D, 5,000 to \$500,000. Or E, half a million, or more. Lots of C's and D's coming in, no A's yet, no A's yet, D, D, a few E's now. I have one A. Who are you, the person who has an A? You are not human. Two A's now, Lorette. Look at that. I want the A's to show me proof that they have under 50 unread emails in their main email box.

01:31:45 Alicia L.: But, Lorette, you see how everybody has this problem? So now I would say, alright, everybody, well, let's start off by building you Um, your AI chief of Staff who's checking your emails every day to get you to zero, every single day, and handling all your priorities for you. Yes? And then you think about it, how much would your client pay you to solve that problem for them? to empty out their email box and be more productive. If someone had come to me and told me, for the next 365 days, you don't have to check your email, you don't have to respond to your email, but everybody around you will tell you that you will be the best email responder they have ever seen, doing way better than you've ever done.

01:32:27 Alicia L.: Then, um, how much would you pay for that? I would have said \$5,000 right now, like, Cash App, Venmo, Zelle, how can I send it to you if you can solve this problem for me? So it's a big problem, um, that is getting solved for me. So, think about the problems that you solve, and your potential clients, and what they would pay to have that problem solved. I say it to myself all the time, like, I do not care how much Manus will charge me for Maximus, I cannot live without him. I'm doing so much better in life. I'm...

01:32:55 Lorette L.: Exactly. No, exactly! So, you know, when you look at it relatively, like, you're like, would I hire another person? How much would that person cost you? So if you're complaining about, you know, oh, I'm spending a couple hundred, how much would you be paying a person right if you were having somebody to do that for sure.

01:32:56 Alicia L.: Holler at? That's right. That's right. Well, Rhett, can we take a quick 7-minute break? I just need a quick break.

01:33:14 Lorette L.: Yeah. So. Yeah. I was just gonna say that.

01:33:17 Alicia L.: And then while we're doing that, while you're doing that, if you can tell people if they need support, because I'm getting some support

emails, support messages, and you know I'm... Um, if you can tell people how to get that, and then how to upgrade. I'm getting a lot of upgrade messages. I'll be right back in 7 minutes, and if we can spotlight Lorette, that would be amazing.

01:33:35 Lorette L.: Yeah. All right. All right. So let's give it up for Alicia. I mean, she went over a ton of stuff, and if... oh, there you go. So first of all, let's give it up for Alicia. I see Jamar, I see you guys. Hooray! Yes, yes, amazing. So she was just dropping gems. Would you guys agree? And gems that were valuable like things that you can actually go and implement. She was showing you go here, go here.

01:33:44 Alicia L.: Thank you

01:34:04 Lorette L.: And that secret feature in ChatGPT, I mean, they don't talk about that. She's giving you secret behind the stuff, behind the scenes things. So that secret feature, value, value, value, yes. So what I want you to do right now is we have a seven minute break. So if you need to get something, I actually ran and got some food real quick.

01:34:10 Lauren W.: If you've tried ChatGPT... This guide has you covered. You'll learn everything about what is...

01:34:22 Lorette L.: But if you need to get some food real quick, go to the bathroom, stretch, get a drink, go do that right now and come right back. So we've got just a seven minute break. I'm going to keep talking, but those of you that need to step away, get up, stretch your legs, go do that. Charlize, I see you sitting down. Let's do some stretches.

01:34:25 Lauren W.: And if you're completely new, don't worry. Writing, analyzing, organizing... Let's start with proxy.

01:34:41 Lorette L.: Get up, I see you. I see you. All right. So let's get up and stretch your legs, and then come right back, then come right back. All right. So I'm just going to talk about a few things right now. So 1st of all, those of you that need any support, if you need any support, we do have that. chat link if you're having any troubles with anything. Team, if you can drop the link for support. Okay, drop the link for support. So somebody was asking about, can you recap that hidden in that hidden secret, the secret? So she was talking about scheduling tasks inside of ChatGPT. So she was mentioning how you can, you know, like every morning at 6 a.m, send me a daily briefing about all the

stuff that's happening in AI. So that is what she wants it to do, but she wants it to schedule it every day.

01:35:32 Lorette L.: Now that there's a schedule option in your settings. In your settings, there's a schedule option, but that doesn't show up unless you're giving it those instructions. So step one is to give instructions, say, hey, I want this every day at whatever, like, give them the schedule. And then once you push go and it's activating, then now you can go into that setting section and schedule it. So you've got to do that as step one and then step two is setting schedule. Okay, so that is that secret gem like that scheduling doesn't show up until you.

01:36:04 Lorette L.: ask it to do it, if that makes sense. Okay? So that is like you got to activate it in order for it to show up. Okay, so that was that special thing. So she talked about Manish, she talked about clawed co-work, the chief of staff. We talked about Maximus. I see lots of names for mine, which is great.

01:36:21 Lorette L.: And I've been using agents as well, so helping me, I do have my chief of staff. I don't have one as amazing as Maximus yet, but I need to train. What do Maxine a little bit better. So her and Maximus can can talk. They will be talking the storm up, right? They'll probably be plotting against us, saying, hey, we need to make sure Lorette does this and Alicia does that. But yeah, so we've got those. It's really helpful. It's helped me a lot with my day to day activities.

01:36:47 Lorette L.: sure that I'm on track with things. I love the daily briefings every day. You know, I used to watch, you'd see some, like, people on TV, like the CEOs and the big shots, they would be in their office. You guys have probably seen movies like this. and their executive assistant would come in with their notebook, and they'll say, this is your schedule for the day, and they would go through the schedule for the day. Now, instead of having that person coming in, which you probably didn't have, now you have your AI agent that can do the same thing. Pretty cool, pretty cool. All right. So let's see. All right. Now, another thing that I want to do is I want to just share my screen real quick.

01:37:29 Lorette L.: and I'm just going to show you. the upgrade. I know a lot of you have upgraded already, which is amazing. So congratulations for upgrading. But I also wanted to show you some of the differences. Okay, here, this is what

everybody gets for free, right? This is the free version. Now, if you upgrade to priority pass, you're gonna get the boot camp, which is happening right now. You get this work, but you also get the lifetime recordings. So the recordings is amazing. You can go back and listen to it.

01:37:51 Lauren W.: 2 o'clock!

01:37:58 Lorette L.: you know, check what you're doing, which I think is very valuable. You also get a troubleshooting guide. Now, I have that right here, uh, right here. This is the... Agent's troubleshooting Guide. Now, why would you need this? Because sometimes when you're building your agent, it's just not working right. Like, maybe you're like, hey, I did everything, but it's not giving me the outputs that I want. So what this is, is going to help you troubleshoot some common errors or common things that happen when you're building your AI agent. So, first of all, it's beautiful, right? And here it takes you all this top 10 fixes, a cheat sheet.

01:38:33 Lorette L.: symptoms, pre-flight checklist, error messages, common prompt templates, 28 ready to paste prompts that request you... that request you make most often, and it's a very comprehensive guide. Look at this one. The voice doesn't match mine. It sounds too AI, too corporate, generic, not how I write. So then here is what you do to fix it.

01:38:55 Lorette L.: fix it, right? My agent is making things up. This is how you fix it. It sounds too generic. This is how you fix it. So this is the troubleshooting guide. So you can see how helpful that is. Now we've also got the full notebook, the full note. So amazing notes not only to give you the recordings, but we all give you notes. So this is now, if you go to executive. We also get a swipe file. Let me show you that. Okay, so this is your swipe file. Now, with your swipe file.

01:39:24 Lorette L.: We are giving you 11 AI agents, 33 ready to paste prompts, three skill tiers, and one daily stand up. So all of this is gonna help you create a coordinated team, right? It's not just like, here's some 10 prompts, but we actually walk you through. how to create your team, how to use this library walks you through it. And it gives you these different agents, your prompt library. So extremely detailed and helpful. Okay? So that is your swipe file. Then last, we have the seven-figure Agent Playbook. So right here.

01:40:01 Lorette L.: We've got the seven agent figure playbook. All right. So this is your strategic architecture between a 7 figure agent driven servant service

business. So this gives you service models, pricing frameworks, architectures, and so forth. So it walks you through everything that you need in order to have an amazing 7 figure agent.

01:40:24 Lorette L.: All right. So that was just a quick walkthrough of the different things that you get in the different packages. All right. Okay? All right. So any questions with that? So we do have the link so linked. So team, if you could drop that link, if people want to upgrade again, and we will put that in there. The team's going to put that link. All right. Okay. Let's go ahead and stop sharing that. All right. Okay. So that is the option to upgrade. I see people dropping the link there again. The team who are upgrading get recordings, slide files, exclusive bonuses, so you have your choice if you want to just do the priority pass.

01:41:03 Lorette L.: Or you want to upgrade it to the executive pass. Now, remember, with both of them, we are actually going to have an extra Q&A session at the end of this, so you're just going to hang on, and we're going to ask you more questions. Alicia is going to go through more questions as well. Now, let's see. All right. So I just see a few questions. Again, if you have any technical issues, the support team is here, and they can help you. Some people asking if you're in some of our other programs like, for example, if you're in the consultant program, this is not part of the consultants program. So this is separate. So if you were.

01:41:43 Lorette L.: you know, want to get the priority of the executive pass, you would need to purchase that separately. All right. Let's see. So Bridget, you were asking, can I go over what I said? So I was just going over the stuff that was available for upgrading. So if you wanted to upgrade to priority or executive. So team, if you can make sure Bridget gets that link, so just going over the different things that you can get.

01:42:09 Lorette L.: in that package. Um, so Janet is saying, is this different from the VIP and the less package? Completely different. So this is a completely different session. So if you guys were at the last one, you'll see the things that she's teaching today is different. Um, all of the packages that we're offering inside of the VIP package, the executive priority is all new information again.

01:42:30 Lorette L.: All right. Okay, let's see. So question, if you upgraded to priority, how can you add executive? Good question. Team, if we could get that

answer. We could get that
