Why Lovable & *What This Blueprint Does*

Lovable is an AI-powered website builder that turns written prompts into fully functional React web applications. Unlike drag-and-drop builders, Lovable generates real production code — meaning your site is fast, responsive, and deployable anywhere, built entirely through conversation.

The challenge is that a generic prompt produces a generic site. Lovable will build whatever you describe — but most people don't know how to describe a premium, brand-consistent, conversion-optimized website in prompt language. That's what this blueprint solves.

Every prompt in this guide has been engineered to produce MAAT-aesthetic results: dark backgrounds, gold typography hierarchy, serif elegance, sacred geometry details, and copy structures that convert. You don't need to know code. You need these prompts.

What Lovable Is & Is Not

Lovable builds React SPAs — single-page applications that are fast, beautiful, and functional. It is NOT a CMS, e-commerce platform, or database — connect those via integrations (Gumroad, Shopify, Supabase). It IS your front-end: your brand's face to the world.

What This Blueprint Covers

- ▢ The MAAT design system translated into Lovable prompt language
- ▢ 50+ copy-paste prompts for every section, page type, and component
- ▢ Complete master prompts for 5 full page builds (Homepage through Blog)
- ▢ The 12 section library — every block a brand site needs
- ▢ Refinement prompts for iteration, mobile optimization, and troubleshooting
- ▢ The full Scrolls of MAAT site architecture — the real build map
- ▢ A quick-reference prompt vault for instant copy-paste use

Your Visual Language

Every Lovable prompt you write must include these design specifications. They are the constants — the brand DNA that makes every page feel like one cohesive identity. Copy this block into every master prompt.

THE MAAT DESIGN SYSTEM — PASTE INTO EVERY PROMPT

Design system: dark background (#0A0A0A or #111111), primary accent gold (#C9A84C), secondary cream (#F0E8D0), muted text (#BFB49A). Typography: Cormorant Garamond or Georgia serif for headlines, system sans-serif for body. Font hierarchy: large serif display headlines (48–64px), gold uppercase tracking for eyebrow labels (10–12px letter-spacing), cream body text (16–18px line-height 1.7). Spacing: generous whitespace, section padding 80–120px vertical. Accents: thin gold horizontal rules, corner bracket decorations on card elements, diamond divider icons between sections. Mood: regal, ancestral, editorial luxury — not corporate, not tech startup.

COLOR REFERENCE

ROLE	HEX CODE	USAGE
Background	#0A0A0A	Page backgrounds, section fills
Card/Surface	#141414	Cards, panels, inset sections
Gold Primary	#C9A84C	Headlines, CTAs, borders, icons
Gold Dark	#9A7830	Secondary gold, dividers, tags
Cream Primary	#F0E8D0	Body text, subheadings, content
Cream Muted	#BFB49A	Descriptions, meta text, captions
Cream Faint	#7A7060	Footer text, disabled states

The One Rule

If a section feels wrong, the fix is almost always: more contrast, more breathing room, or bolder gold. When in doubt, go darker background and brighter gold.

What Every Brand Site Needs

A complete brand website is not one page — it's a system of pages serving different visitor intents. These 8 types cover every function a creator or entrepreneur brand needs.

01 Homepage BRAND ENTRY POINT

The two-door selector. Sets brand identity, communicates the mission, routes visitors to Lab or Orchard. Must answer: Who is this for? What do they get? What's next?

02 Landing Page FUNNEL / CONVERSION

Single offer. No nav. One CTA. Used for paid traffic, lead magnets, and product launches. The highest-converting page type when built correctly.

03 About / Story Page BRAND PHILOSOPHY

The founder's narrative and brand origin. Builds trust and emotional connection. Who built this, why, and what they believe. The Never-Sell Doctrine lived as a page.

04 Product / Offer Page SALES PAGE

Full sales page for a single product or membership tier. Includes: hook, problem, solution, features, social proof, price, and CTA.

05 Blog / Content Hub AUTHORITY + SEO

Educational content organized by topic. Feeds organic traffic and demonstrates expertise. Each post is a Trap post in long-form format.

06 Course / Resource Hub MEMBER VALUE

Organized access to digital products, PDFs, videos, and tools. The Lab and Harvest portals. Links out to Wix LMS or Gumroad.

07 Shop Page

E-COMMERCE

Product grid linking to Gumroad or Shopify. Each card: product image, name, price, CTA. Can embed Gumroad overlays directly or link to external checkout.

08 Contact / Apply Page

RELATIONSHIP ENTRY

For Sovereign-tier inquiries, Moor Graphix client work, and speaking requests. Simple form, clear expectations, no pressure.

Build in Blocks

Every page is assembled from sections. These 12 section types cover every conversion, trust, and content function a brand site needs. Each can be prompted individually and dropped into any page.

01

HERO
ENTRY · CONVERSION

Full-width opening. Headline, subheadline, one CTA. The most important section on any page.

02

TWO-DOOR
NAVIGATION · CHOICE

Two equal-weight cards routing to distinct paths. The Lab / The Orchard selector on scrollsofmaat.com.

03

MANIFESTO
TRUST · PHILOSOPHY

Long-form brand statement in editorial pull-quote style. Sets ideology before any offer.

04

FRAMEWORK
EDUCATION · AUTHORITY

Numbered or stepped explanation of a concept or system. The 5 Traps, The MAAT Framework, the production workflow.

05

PRODUCT GRID
CONVERSION · BROWSE

2-3 column card grid. Each card: icon, name, description, price, CTA. Used for Lab products, tier comparison, and shop pages.

06

TESTIMONIALS
SOCIAL PROOF · TRUST

Pull quotes with attribution. Dark cards, gold quotation marks. 2-3 testimonials max — quality over volume.

07

TIER TABLE

CONVERSION · COMPARE

Membership tier comparison. Features listed per tier. Recommended tier highlighted in gold.

08

FAQ

OBJECTION HANDLING

Accordion or stacked Q&A.; Answers the most common objections before they become reasons not to buy.

09

EMAIL CAPTURE

LEAD GENERATION

Single field, single CTA. Hooks to MailerLite embed. Lead magnet offer as the incentive.

10

FOOTER

NAVIGATION · LEGAL

Nav links, social links, legal disclaimers. MAAT brand mark. Minimal and clean.

11

CONTENT FEED

AUTHORITY · SEO

Blog post cards or resource tiles. Title, category tag, excerpt, and 'Read' CTA per card.

12

CTA BANNER

CONVERSION · CLOSING

Full-width dark-gold call to action. One headline, one button. Used at page bottom before footer.

Complete Homepage Build

Paste this entire prompt into Lovable to generate a complete homepage. Fill all [BRACKETED] variables with your brand details.

LOVABLE PROMPT — FULL HOMEPAGE

Build a complete single-page homepage for [BRAND NAME], a [BRAND DESCRIPTION]. Design system: dark background #0A0A0A, gold accent #C9A84C, cream text #F0E8D0, muted text #BFB49A, card surfaces #141414. Typography: Cormorant Garamond serif for headlines, system sans for body. Gold uppercase spaced labels for section eyebrows. Include these sections in order: (1) Fixed navigation bar: logo left [BRAND NAME in gold serif], nav links right [NAV ITEM 1 | NAV ITEM 2 | NAV ITEM 3], gold CTA button [CTA TEXT]. (2) Hero section: full viewport height, centered headline in large serif '[MAIN HEADLINE]' with gold accent word, italic subheadline '[SUBHEADLINE]'; two CTA buttons side by side '[PRIMARY CTA]' filled gold and '[SECONDARY CTA]' outlined. Thin gold divider line above section label 'MOOR ASCENSION AND TRIUMPH'. (3) Two-door selector: side-by-side cards with corner bracket decorations, left card '[DOOR 1 LABEL]' with icon and description '[DOOR 1 DESC]', right card '[DOOR 2 LABEL]' with icon and description '[DOOR 2 DESC]'. (4) Brand manifesto: centered pull-quote in italic serif, '[MANIFESTO QUOTE]' in gold, attribution in muted text below. (5) Framework section: numbered list 01-05 with the [5 FRAMEWORK ITEMS], each with title and one-line description, gold number, cream title, muted description. (6) Email capture: centered section, headline '[EMAIL HEADLINE]', single email input field, gold submit button '[EMAIL CTA]'. (7) Footer: brand name in gold serif, nav links, copyright. Make the site fully responsive. No lorem ipsum — use the copy I provide.

▢ Replace all [BRACKETED] items before pasting. Typical build time: 5-8 minutes.

EMAIL CAPTURE — [INPUT] [SUBMIT]

FOOTER

Landing Page / Funnel Page

The highest-converting page type. No nav. No distractions. One offer. One CTA. Used for lead magnets, product launches, and paid traffic.

LOVABLE PROMPT — FULL LANDING PAGE

Build a conversion-optimized landing page for [OFFER NAME], [OFFER DESCRIPTION]. NO navigation bar — this is a standalone funnel page. Design system: dark background #0A0A0A, gold #C9A84C, cream #F0E8D0, muted #BFB49A. Cormorant Garamond serif headlines, generous vertical spacing. Include these sections in order: (1) Hook hero: eyebrow label '[AUDIENCE LABEL]' in gold uppercase, headline '[BOLD HOOK HEADLINE]' large serif, subheadline '[PROBLEM STATEMENT]', CTA button '[PRIMARY CTA]' in solid gold. (2) Problem section: 3 pain point cards in a row, dark surface #141414, gold icon or number, cream title, muted description. Pains: [PAIN 1], [PAIN 2], [PAIN 3]. (3) Solution reveal: headline 'Introducing [OFFER NAME]', italic description '[OFFER DESCRIPTION]', 5-6 bullet points of what's included with gold checkmark icons. (4) Social proof: 2-3 testimonial cards, dark background, gold quotation mark, italic quote text, name and descriptor below. (5) Offer box: centered, gold border, product name, price '[PRICE]', value stack list, primary CTA button '[BUY/JOIN CTA]', secondary text '[GUARANTEE or RISK REVERSAL]'. (6) FAQ: 4-6 questions and answers in accordion or stacked format. (7) Final CTA: full-width banner, headline '[URGENCY HEADLINE]', repeat CTA button. (8) Footer: minimal — legal links and copyright only. Make fully mobile-responsive. No lorem ipsum.

□ *For free lead magnet pages: remove the offer box price and replace with email capture.*

About / Story Page

The trust page. Where philosophy lives. This is the Never-Sell Doctrine expressed as a page — give value, build belief, let the offer feel inevitable.

LOVABLE PROMPT — ABOUT / STORY PAGE

Build an About page for [BRAND NAME] with the following sections: (1) Opening declaration: full-width hero with italic serif headline '[BRAND PHILOSOPHY STATEMENT]' centered, no CTA — this section is pure brand voice. (2) Origin story: two-column layout — left column has a portrait image placeholder (dark background image block), right column has the founder story in serif body text: '[PARAGRAPH 1 — THE PROBLEM YOU EXPERIENCED]' '[PARAGRAPH 2 — THE TURNING POINT]' '[PARAGRAPH 3 — WHAT YOU BUILT AND WHY]'. (3) The belief system: centered section titled 'What We Believe' in gold serif, 3-4 belief statements as large italic quotes in cream, each with a thin gold rule below. Beliefs: [BELIEF 1], [BELIEF 2], [BELIEF 3], [BELIEF 4]. (4) Brand values: 3-column grid of value cards, dark surface, gold icon or symbol, value name in cream serif, short description in muted text. Values: [VALUE 1], [VALUE 2], [VALUE 3]. (5) Transition CTA: editorial-style section, headline '[INVITATION HEADLINE]'; two buttons: '[PRIMARY PATH — THE LAB]' and '[SECONDARY PATH — THE ORCHARD]'. Design system: #0A0A0A background, #C9A84C gold, #F0E8D0 cream, serif typography. No hard sell. This page is an invitation, not a pitch.

▢ *Keep the founder story section under 300 words total. Long copy kills trust on About pages.*

LOVABLE PROMPT — INDIVIDUAL BELIEF STATEMENT COMPONENT

Add a belief statement component to the About page. Large italic serif quote: '[BELIEF STATEMENT]' in cream, font size 22-26px. Gold ornamental diamond icon above. Thin gold horizontal rule below. Centered. Dark background. Generous top and bottom padding (60px+). Fade-in animation on scroll.

▢ *Repeat this prompt for each belief statement you want to add.*

Product / Offer Page

The full sales page for a single product or membership tier. Follows the Hook · Story · Offer framework from the Ad Creative System.

LOVABLE PROMPT — PRODUCT / MEMBERSHIP OFFER PAGE

Build a sales page for [PRODUCT NAME], [PRODUCT TAGLINE]. Design: #0A0A0A background, #C9A84C gold, #F0E8D0 cream, #141414 card surfaces. Cormorant Garamond serif headlines. (1) Hook hero: eyebrow '[TARGET AUDIENCE]', headline '[TRANSFORMATION HEADLINE]', subheadline '[MECHANISM STATEMENT]', primary CTA '[JOIN / GET ACCESS]'. (2) Problem section: 'If this sounds familiar...' header, 3 pain point cards: [PAIN 1], [PAIN 2], [PAIN 3]. (3) Transformation bridge: italic serif quote '[BRIDGE STATEMENT — before to after]', followed by 2-paragraph body text explaining the system. (4) What's inside: section header 'Everything You Get', 2-column feature grid, each item: gold icon, feature name in cream, description in muted. Features: [FEATURE 1 through FEATURE 8]. (5) Tier pricing table (if membership): 3 columns — [TIER 1 NAME] at [PRICE], [TIER 2 NAME] at [PRICE], [TIER 3 NAME] at [PRICE]. Middle tier highlighted with gold border as 'Most Popular'. Each tier lists [TIER FEATURES]. CTA button per tier. (6) Social proof: 2 testimonials. (7) Guarantee section: centered, gold seal icon, '[GUARANTEE STATEMENT]'. (8) Final CTA banner: headline '[CLOSING HEADLINE]', repeat main CTA button. Integrate Gumroad checkout: make CTA buttons link to [GUMROAD PRODUCT URL]. Mobile responsive. No lorem ipsum.

LOVABLE PROMPT — ADD TIER COMPARISON TABLE TO ANY PAGE

Add a membership tier comparison table to the current page. 3 columns: [TIER 1 — SCHOLAR \$27/mo], [TIER 2 — SCRIBE \$47/mo], [TIER 3 — BUILDER \$97/mo]. Middle column has gold border and 'Most Popular' badge in gold. Rows: [LIST OF FEATURES — one per row, checkmark or dash per tier]. CTA button at bottom of each column linking to [GUMROAD URL]. Dark background, gold accents, fully responsive.

▢ Add a 4th Sovereign column (\$797) only when highlighting high-ticket tier.

Blog / Content Hub Page

The authority engine. Long-form content that feeds organic traffic, demonstrates expertise, and converts readers into leads over time.

LOVABLE PROMPT — BLOG / CONTENT HUB PAGE

Build a blog and content hub page for [BRAND NAME]. Design: #0A0A0A background, #C9A84C gold, #F0E8D0 cream, card surfaces #141414. (1) Hero: headline 'The [BRAND NAME] Scrolls' or '[CONTENT HUB NAME]' in large gold serif, subtitle '[CONTENT DESCRIPTION — what readers will learn here]'. Category filter tabs below: [CATEGORY 1] [CATEGORY 2] [CATEGORY 3] [ALL]. (2) Featured post: full-width card at top, dark surface, category tag in gold uppercase, large headline, excerpt, 'Read More' link in gold. (3) Post grid: 3-column responsive grid, each card: dark surface #141414, gold top border, category label, headline, 1-2 line excerpt, date, read time, gold 'Read' link. (4) Lead magnet inline: after row 2, a full-width email capture banner — headline '[FREE RESOURCE OFFER]', email input, gold CTA button. (5) Pagination or 'Load More' button in gold outline style. All post data can be hardcoded as placeholder cards — I will update content manually. Fully responsive. Category filters should show/hide posts by category tag.

LOVABLE PROMPT — INDIVIDUAL BLOG POST PAGE

Build a single blog post page template for [BRAND NAME]. Layout: narrow centered reading column (680px max-width), dark background, cream body text (18px, line-height 1.8). Include: gold top category tag, large serif headline, author name and date in muted text, thin gold rule, body content area with pull-quote styling (left gold border, large italic text) for blockquotes, section subheadings in gold serif, inline CTA box midway through post (dark card, gold border, offer headline, CTA button), and related posts section at bottom (3 cards). No sidebar. Clean reading experience only.

▫ *This template is reused for every post — swap in new headline/content each time.*

Iteration & Troubleshooting System

After your initial build, use these targeted prompts to fix, refine, and upgrade specific elements. Each prompt addresses one specific problem.

FIX — SECTION FEELS TOO LIGHT / OFF-BRAND

The [SECTION NAME] section feels too light. Make the background darker (#0A0A0A or #080808), increase the gold accent usage on titles and labels, add a thin gold horizontal rule between the eyebrow label and the headline, and increase vertical padding by 20px top and bottom.

▢ Use when: a section looks washed out or generic.

FIX — TYPOGRAPHY HIERARCHY BROKEN

Fix the typography hierarchy in [SECTION NAME]. The main headline should be Cormorant Garamond serif, 48–56px, cream (#F0E8D0). The eyebrow label above it should be 10–11px, uppercase, gold (#C9A84C), letter-spacing 0.2em. Body text should be 16–18px, line-height 1.7, muted cream (#BFB49A). Subheadings within the section: 22–26px serif, cream.

▢ Use when: fonts look inconsistent or body text is too large/small.

FIX — MOBILE LAYOUT BROKEN

Fix the mobile layout for [SECTION NAME]. On screens under 768px: stack all columns to single column, reduce headline font size by 30%, increase tap target sizes on all buttons to 44px minimum, add 20px horizontal padding to prevent text touching screen edges, hide any decorative elements that cause overflow.

▢ Use when: the section looks broken on phone screens.

UPGRADE — ADD SCROLL ANIMATIONS

Add scroll-triggered fade-in animations to all sections on the page. Each section should start invisible (opacity 0, transform translateY 20px) and animate to visible (opacity 1, transform translateY 0) when it enters the viewport. Duration: 0.6s, ease-out. Stagger child elements within sections by 0.1s each.

▢ Use after your page is structurally complete.

UPGRADE — ADD GOLD CORNER BRACKETS TO CARDS

Add decorative gold corner bracket accents to all card elements on the page. Each card should have thin gold lines (1px, #9A7830) forming an L-shape at the top-left and bottom-right corners, extending 12px on each side. The brackets should be CSS pseudo-elements, not borders.

▢ Use on any page where cards look plain or lack premium feel.

UPGRADE — ADD DIAMOND DIVIDER BETWEEN SECTIONS

Add a decorative diamond divider between [SECTION A] and [SECTION B]. The divider: a thin gold horizontal line (#9A7830, 0.5px) with a small rotated gold square (4x4px, filled #C9A84C) centered on it. 40px vertical margin above and below. Full width of the content area.

▢ Use to visually separate sections that feel too close together.

UPGRADE — MAKE CTA BUTTON PULSE

Add a subtle pulse animation to the primary CTA button on [PAGE/SECTION]. The button should have a gold glow that expands and fades on a 2-second loop: box-shadow from 0 0 12px rgba(201,168,76,0.4) and back. Subtle enough to draw attention without being distracting.

▢ Use sparingly — one pulsing button per page maximum.

UPGRADE — ADD STICKY NAV WITH SCROLL EFFECT

Make the navigation bar sticky and add a scroll effect. At page top: transparent background with gold text. After scrolling 80px: solid dark background #0D0D0D with a 1px gold bottom border, smooth transition 0.3s ease. Nav should remain fixed at top of screen on all scroll positions.

▢ Use on any page with a hero section and a navigation bar.

Prompt Library

ADD NAVIGATION BAR

Add a fixed navigation bar: brand name '[NAME]' in gold Cormorant Garamond serif left, nav links '[L1] | [L2] | [L3]' in cream right, gold CTA button '[CTA]' far right. Dark background #0D0D0D, 1px gold bottom border. Sticky on scroll.

ADD HERO SECTION

Add a hero section: full viewport height, dark #0A0A0A background, eyebrow label '[LABEL]' in gold 10px uppercase, large serif headline '[HEADLINE]' with gold accent word, italic subheadline '[SUBHEADLINE]', two CTA buttons: '[PRIMARY]' filled gold, '[SECONDARY]' outlined gold.

ADD PRODUCT CARD GRID

Add a 3-column product grid. Each card: dark surface #141414, gold top border 1px, small icon, product name in cream serif, one-line description in muted text, price in gold, 'Get Access' button. Products: [LIST NAMES AND PRICES].

ADD EMAIL CAPTURE SECTION

Add an email capture section: centered layout, headline '[HEADLINE]' in gold serif, subheadline '[WHAT THEY GET]', email input field with placeholder 'Your email', gold submit button '[CTA TEXT]'. MailerLite embed or form action '[FORM URL]'. Dark background, generous vertical padding.

ADD TESTIMONIAL CARDS

Add a testimonials section: 2-3 dark cards (#141414) in a row, gold opening quotation mark (large, 48px), italic serif quote text in cream, name in gold below, descriptor/title in muted text. Section header: 'What Members Say' in gold serif.

ADD FOOTER

Add a footer: dark background #080808, thin gold top border. Brand name in gold serif centered top, nav links in cream below, social icons (TikTok, Instagram) in gold. Copyright '[YEAR] [BRAND NAME]. All rights reserved.' in muted text. Optional tagline in italic cream: '[TAGLINE]'.

ADD ANIMATED SECTION COUNTER

Add an animated statistics counter section: 4 metrics in a row, each with a large number in gold that counts up on scroll, label below in muted uppercase. Metrics: [STAT 1], [STAT 2], [STAT 3], [STAT 4]. Dark background, thin gold borders between items.

ADD SCROLL-TO-TOP BUTTON

Add a scroll-to-top button: fixed position bottom-right corner, circular button 44px diameter, dark background, gold upward arrow icon. Only visible after user scrolls 400px down. Smooth scroll to top on click.

"Your website is your digital headquarters. Build it like you intend to be there for generations."
