Why Mockups Are *Your First Sale*

Most apparel brands spend thousands on photoshoots before they've sold a single item. A photographer. A studio. Models. Samples. Retouching. Then they launch — and discover no one wanted the product.

The AI-powered clothing mockup system flips that sequence entirely. You generate photorealistic product images before production. You validate demand with real sales. You only print what's already sold.

This is not about cutting corners. The mockups produced through this system are indistinguishable from studio photography to the average consumer — editorial-quality images across every platform format, generated from a prompt sequence.

The Core Principle

Validate first. Print second. The mockup IS the product until the customer pays.

What This System Covers

- ▢ How to generate T-shirt, hoodie, hat, and accessory mockups with AI
- ▢ The exact prompt formulas that produce consistent, on-brand results
- ▢ How to show your apparel on diverse model types without a casting call
- ▢ Lifestyle and contextual shots — your product in the world
- ▢ Platform-ready sizing so every image hits specs for TikTok, Instagram, and Shopify
- ▢ How to maintain brand consistency across an entire product line
- ▢ The Amerukhan Basics workflow — how this system was built for a real brand

Your Creative Arsenal

Each tool has a different strength. The system uses them in combination. Free tiers are sufficient for most tasks — premium unlocks volume and resolution.

▣ Krea.ai

IMAGE GENERATION · BEST FOR MOCKUPS

Specialized mockup templates with drag-and-drop product placement. Fastest path from design file to photorealistic product image. Best for: T-shirts, hoodies, hats, bags.

krea.ai

▣ Adobe Firefly

IMAGE GENERATION · COMMERCIAL SAFE

Commercially licensed AI images. Every output is safe for paid ads and product listings. Best for: lifestyle shots, model imagery, promotional creatives.

firefly.adobe.com

▣ Midjourney

IMAGE GENERATION · PREMIUM QUALITY

Highest-quality cinematic outputs. Best for hero images, editorial product photography, and luxury brand aesthetics. Unmatched for the MAAT aesthetic.

midjourney.com

▣ Canva AI

DESIGN + GENERATION · BEGINNER FRIENDLY

Integrated AI generation inside a full design tool. Best for mockups that need text overlay, price tags, sale banners, or social media formatting.

canva.com

▣ DALL·E 3 (ChatGPT)

IMAGE GENERATION · MOST ACCESSIBLE

Built into ChatGPT Plus. Excellent for quick iteration and concept testing before committing to a Midjourney or Krea run. Best for rapid prototyping.

chat.openai.com

▣ Remove.bg / Clipdrop

BACKGROUND REMOVAL · FINISHING TOOL

Remove backgrounds from AI-generated mockups instantly. Creates transparent PNGs for placement on any background or scene. Essential finishing step.

remove.bg · clipdrop.co

Every Shot Your Brand Needs

01

FLAT LAY

Ghost Mannequin / Flat Surface

The product alone on a clean surface. White, cream, or dark backgrounds. Standard for Shopify product listings. Eliminates model costs while maintaining professional presentation.

02

ON-MODEL

Human Figure / Lifestyle Model

Your product on a diverse AI-generated model. Specify body type, skin tone, gender, setting, and expression. Highest-converting mockup type — customers need to see themselves in your product.

03

LIFESTYLE

Product in Context / Environmental Scene

The product exists in the world. Hoodies at a coffee shop, hats on a beach, tees at a cultural event. Tell the story of who wears your brand and when. Best for TikTok and Instagram content.

04

CLOSE-UP / DETAIL

Fabric, Print, Embroidery Focus

Zoomed shots that show texture, print quality, stitching, and design detail. Builds confidence in product quality for online shoppers who can't touch what they're buying.

05

BACK VIEW

Secondary Angle Shot

Always show the back. Back print designs, hem labels, and silhouette shots. Completes the product story and reduces customer questions and returns.

06

COLLECTION SHOT

Multiple Products in Frame

Two to five products in a single composed shot. Creates a collection identity and encourages bundle purchases. Use matching background and lighting for cohesion.

07

BRANDED SCENE

Logo / Identity Integration

Your brand mark, typography, and color system integrated into the scene. Signs, posters, packaging, and product together. Your highest-leverage content creation fodder.

From Design File to *Shoppable Image in 30 Minutes*

01

PREPARE YOUR DESIGN FILE

Export your apparel design as a transparent PNG. 300 DPI minimum. In Canva: Download ▢ PNG ▢ Transparent background. In Photoshop or Illustrator: hide the background layer before exporting.

02

CHOOSE YOUR MOCKUP TYPE

Decide which of the 7 types this batch needs. Start with flat lay (fastest), then add on-model shots. One session should produce 3-5 mockups across types.

03

RUN YOUR PROMPT IN KREA OR MIDJOURNEY

Use the exact formulas from Sections 04-06. For Krea.ai: upload your design file directly to the mockup tool. For Midjourney: use /imagine with the full prompt structure including garment, color, model, setting, and lighting specs.

04

REFINE AND ITERATE

Upscale the best outputs. Use 'Vary (Subtle)' in Midjourney for variations. In Krea, adjust placement, scale, and warp to fit the design on the garment. Target: 3 final selects per mockup type before moving to finishing.

05

FINISH AND EXPORT

Run through Remove.bg to create clean cutouts if needed. Resize to platform specs (see Section 08). Save both high-res (print ads) and compressed web versions. Organize by: [Product Name] ▢ [Mockup Type] ▢ [Platform].

Pro Tip – Batch by Product, Not by Type

Complete all 5 steps for one product before moving to the next. Switching context mid-session wastes prompt credit and time.

T-Shirts & Hoodies

Copy, fill the [BRACKETED VARIABLES], and paste directly into your AI tool. Always specify garment color and design description for accurate results.

FLAT LAY — T-SHIRT

Flat lay product photography of a [BLACK] unisex cotton t-shirt with [GOLD GEOMETRIC MAAT SYMBOL] screen print on the chest, placed on a dark charcoal surface, natural studio lighting, top-down perspective, commercial product photography, ultra-sharp, 8K resolution, professional fashion catalog style

ON-MODEL — T-SHIRT (MALE)

Male model wearing a [BLACK] graphic t-shirt with [ANCESTRAL MAAT SYMBOL] print on chest, confident posture, arms at sides, plain dark background, studio lighting, mid-shot waist up, diverse skin tone, editorial fashion photography, photorealistic

ON-MODEL — T-SHIRT (FEMALE)

Female model wearing a [BLACK] fitted graphic t-shirt with [GOLD GEOMETRIC DESIGN] print, relaxed pose, hands in pockets, natural light, urban setting, documentary street style, photorealistic, editorial quality, diverse representation

LIFESTYLE — HOODIE

Man wearing a [CHARCOAL GREY] pullover hoodie with [MOOR ASCENSION AND TRIUMPH] embroidered chest logo, seated at outdoor cafe, morning golden hour lighting, coffee cup on table, candid documentary style, bokeh background, photorealistic editorial quality

FLAT LAY — HOODIE

Overhead flat lay of a [CHARCOAL GREY] heavyweight hoodie with [GOLD] embroidered logo, folded to show front design, arranged on aged wood surface with [SINGLE GOLD COIN PROP], moody directional lighting, luxury brand aesthetic, 8K commercial photography

Hats, Bags & Accessories

5-PANEL SNAPBACK — FLAT

Product photography of a [BLACK] 5-panel snapback hat with [EMBROIDERED MAAT FEATHER LOGO] on front panel, placed on dark surface at slight angle showing front and brim, studio lighting, clean background, commercial product shot, 8K, ultra-detailed stitching visible

HAT — ON-MODEL

Close-up portrait of a [MALE/FEMALE] model wearing a [BLACK] snapback hat with [GOLD EMBROIDERED LOGO], slight downward head tilt showing logo clearly, confident expression, dark moody background, directional studio lighting, photorealistic editorial photography

TOTE BAG — LIFESTYLE

Woman carrying a [BLACK CANVAS] tote bag with [GOLD SCREEN PRINTED ANCESTRAL SYMBOL] over shoulder, walking in an [URBAN / MARKET / OUTDOOR SPACE] setting, natural daylight, candid street photography, photorealistic, lifestyle brand quality

TOTE BAG — FLAT LAY

Overhead flat lay of a [BLACK CANVAS] tote bag with [GOLD PRINT DESIGN] lying flat, handles spread at top, small [BRANDED ITEMS] placed nearby as props, cream linen surface, editorial product styling, soft directional light, 8K

PHONE CASE — FLAT

Product flat lay of a [MATTE BLACK] phone case with [GOLD SACRED GEOMETRY PRINT] for [iPhone 15 Pro], minimal styling on dark textured surface, studio lighting, Apple product photography aesthetic, crisp and clean, professional e-commerce quality

MULTI-PRODUCT COLLECTION

Styled flat lay featuring a [BLACK T-SHIRT], [BLACK SNAPBACK], and [BLACK TOTE BAG] all with matching [GOLD MAAT GEOMETRIC DESIGN], arranged artistically on dark slate surface, luxury brand editorial, overhead shot, 8K, cohesive visual identity

Lifestyle & Model Shot Formulas

Lifestyle shots are your highest-engagement content. They show identity, not just product. The goal: make the viewer see themselves in the frame.

CULTURAL IDENTITY — MOOR AESTHETIC

Regal-looking Black man wearing a [CHARCOAL HOODIE] with [GOLD MAAT LOGO], standing in front of a stone archway or ancient building facade, golden hour lighting, dignified expression, powerful and peaceful, editorial fashion meets cultural pride, photorealistic, cinematic composition

FAMILY LEGACY SHOT

Father and young child wearing matching [BLACK T-SHIRTS] with [SMALL GOLD SYMBOL PRINT], walking hand-in-hand in a [PARK / NEIGHBORHOOD / MARKET], golden afternoon light, candid documentary moment, warmth and legacy theme, photorealistic

ENTREPRENEUR / CREATOR

Young Black woman wearing a [BLACK HOODIE] with [GOLD EMBROIDERED LOGO], working on laptop in stylish home office or coffee shop, ring light glow, creative workspace energy, confident and focused, lifestyle brand editorial, photorealistic, aspirational but relatable

STREET CULTURE / URBAN

Group of three diverse young adults wearing [MATCHING BLACK APPAREL] with [GOLD MAAT DESIGNS], standing on a city street corner, golden hour, candid conversation, authentic street photography, not posed, community energy, photorealistic

OUTDOOR / ANCESTOR ENERGY

Tall athletic male model wearing [BLACK OVERSIZED TEE] with [LARGE BACK PRINT], standing on hilltop or rocky terrain, wide landscape background, sunrise light hitting the logo, epic composition, ancestor energy, photorealistic editorial

The Model Prompt Formula

[AGE] [GENDER] [SKIN TONE] model wearing [PRODUCT + DESIGN] · [POSE/ACTION] ·
[LOCATION] · [LIGHTING] · [PHOTOGRAPHY STYLE] · photorealistic

Consistency & *Brand Identity Control*

Maintaining Visual Consistency Across a Collection

The challenge with AI mockups is that every generation is unique. Without a consistency strategy, your product line looks like five different brands. These techniques lock your aesthetic in place across every output.

- 01 CREATE A STYLE SEED PROMPT**
Write a 'base prompt' defining your brand's visual constants: background style, lighting type, color palette, and photography genre. Append it to EVERY mockup prompt you run. Example: '...dark slate background, single directional studio lighting, editorial luxury aesthetic, MAAT gold and charcoal palette, photorealistic 8K'
- 02 USE MIDJOURNEY'S --SEED PARAMETER**
When you find an output you love, copy its seed number from the job info. Add --seed [NUMBER] to future prompts to generate variations that maintain similar composition, lighting, and model appearance. This builds your brand's 'house model.'
- 03 REFERENCE IMAGES (KREA / MIDJOURNEY)**
Upload a previously approved mockup as a 'style reference image.' The AI will match its visual style while applying new prompts. In Midjourney: /imagine [prompt] --sref [URL of reference] --sw 100
- 04 BUILD A PROMPT LIBRARY IN NOTION**
Save every approved prompt with its output image in a Notion database. Tag by: [Product Type] [Mockup Type] [Tool] [Seed Number]. This becomes your brand's visual production manual — replicable by anyone.
- 05 COLOR CORRECTION BATCH WORKFLOW**
After generating mockups, batch-adjust in Canva or Lightroom: +10 warmth, -5 highlights, +5 blacks. This single preset applied across all outputs unifies the color grading and makes everything feel like one cohesive shoot.

Every Image, Every Platform, Perfect

PLATFORM	FORMAT	DIMENSIONS	BEST MOCKUP TYPE
Shopify Product	Square	2048 × 2048 px	Flat Lay / Ghost
TikTok Post	Vertical	1080 × 1920 px	Lifestyle / On-Model
Instagram Feed	Square	1080 × 1080 px	Flat Lay / On-Model
Instagram Reel	Vertical	1080 × 1920 px	Lifestyle Story
Instagram Story	Vertical	1080 × 1920 px	Detail / Close-Up
Facebook Ad	Landscape	1200 × 628 px	Collection / Multi
Pinterest Pin	Vertical	1000 × 1500 px	Lifestyle / Detail
Email Header	Landscape	600 × 300 px	Flat Lay / Collection
Print Ad (Full)	Vertical	2550 × 3300 px	Lifestyle / Hero

Pro Workflow — Generate Once, Resize Many

Always generate your master image at 2048×2048 or larger. Then crop to each platform's required dimensions. Use Canva's Magic Resize to do this in seconds.

This System Built *a Real Brand*

Amerukhan Basics is a cultural apparel brand built entirely using this system. Every product image in the Shopify store, every TikTok thumbnail, and every promotional graphic was generated with these prompt formulas — before a single item was printed.

Here is the exact workflow used for Amerukhan Basics product launches:

- 01 DESIGN CREATION**
T-shirt graphics and logos created in Canva Pro using the MAAT brand system: black backgrounds, gold (#C9A84C) as primary accent, Lora serif typography.
- 02 FLAT LAY FIRST**
Krea.ai used to generate flat lay mockups from uploaded design PNG files. Dark slate surface, directional lighting. These become the main Shopify product images.
- 03 ON-MODEL SHOTS (MIDJOURNEY)**
Lifestyle model shots generated in Midjourney using the on-model prompt formulas. Consistent --seed used across the collection to maintain visual cohesion.
- 04 TIKTOK CONTENT BATCH**
Lifestyle and cultural identity shots generated using Adobe Firefly for commercial safety. Batch of 20 TikTok-format images created in a single 2-hour session — enough content for 3 weeks of daily posting.
- 05 SHOPIFY UPLOAD SYSTEM**
Images organized by: [Product Name] □ [Flat Lay] □ [On-Model] □ [Lifestyle]. High-res files for product listings. Compressed 1:1 squares for thumbnails. Vertical crops for TikTok and Instagram Stories.

"We launched the first collection with zero photoshoot budget. The mockups performed better than real photography in our first split test."

— Moor Graphix / Amerukhan Basics

The Cheat Sheet

THE MASTER PROMPT FORMULA

UNIVERSAL FORMULA

[MOCKUP TYPE] of a [GARMENT TYPE] in [COLOR], featuring [DESIGN DESCRIPTION] on [PLACEMENT], [MODEL DESCRIPTION or FLAT SURFACE], [SETTING], [LIGHTING], [PHOTOGRAPHY STYLE], photorealistic, 8K, commercial quality

TOOL SELECTION QUICK GUIDE

TASK	BEST TOOL	TIME ESTIMATE
Flat lay — product only	Krea.ai	5-10 min
On-model lifestyle	Midjourney	10-20 min
Commercial-safe model shot	Adobe Firefly	5-15 min
Quick concept test	DALL-E 3 (ChatGPT)	2-5 min
Background removal	Remove.bg	< 1 min
Social media resize	Canva Magic Resize	2-3 min
Full collection batch	Krea + Midjourney	90-120 min

"Your product is already built. The world just hasn't seen it yet."
