The New Music Video *Economy*

For most of recorded history, a music video required a director, a crew, a location, lighting equipment, a camera operator, a colorist, and an editor. The budget started at five figures. The timeline was weeks.

In 2024, that entire pipeline collapsed. Not because the craft became less important — but because AI tools now handle every technical layer that previously required a specialist. The vision is still yours. The execution is now automated.

This kit documents the complete AI music video production workflow — from generating original music to producing a cinematic visual experience — using tools that are either free or under \$30/month combined. The same workflow that produced the Knock It Off brand's visual identity in a single weekend.

The Core Shift

You are no longer the person who executes the technical work. You are the director. The AI is your crew. Your job is vision, direction, and curation — not production.

What This Kit Covers

- ▢ How to generate original, release-quality music with Suno and Udio
- ▢ How to build a visual world for your music using Midjourney prompts
- ▢ How to generate cinematic video footage with Runway Gen-3 and Kling AI
- ▢ How to edit, color grade, and finish your video in CapCut or Premiere
- ▢ 35+ copy-paste prompt formulas across all four production phases
- ▢ Genre-specific style guides: Hip-Hop, R&B, Ancestral/Cultural, Electronic
- ▢ The Knock It Off case study — a complete brand built with this exact system

Music, Video & *Finishing Arsenal*

The stack is organized by production phase. Each tool owns its phase. Together, they form a complete end-to-end video production pipeline.

MUSIC GENERATION

▣ Suno AI

MUSIC GENERATION · FREE TIER + \$10/mo

Type a lyric or style description and Suno generates a complete song with vocals, instrumentation, and production. Best for: creating original songs for music videos, brand anthems, and podcast intros.

suno.ai

▣ Udio

MUSIC GENERATION · FREE TIER + \$10/mo

Higher-fidelity music generation with more granular style control. Better for instrumental tracks, specific genre adherence, and longer song structures. Best for: cinematic scores and beat-driven content.

udio.com

VIDEO GENERATION

▣ Runway Gen-3

VIDEO GENERATION · \$15+/mo

Text-to-video and image-to-video generation. Industry-leading temporal consistency. Best for: cinematic narrative sequences, character-consistent shots, and dramatic motion.

runwayml.com

▣ Kling AI

VIDEO GENERATION · FREE TIER + \$10/mo

High-quality video generation with strong physics simulation and realistic motion. Best for: outdoor scenes, crowd shots, environmental footage, and longer clips (up to 2 minutes).

klingai.com

VISUAL & FINISHING

▣ Midjourney

IMAGE GENERATION · \$10+/mo

Generates the visual storyboards, scene concepts, and still frames that guide your video generation. Also produces thumbnail art, promotional visuals, and scene reference images.

midjourney.com

▣ CapCut / Premiere

EDITING · FREE (CAPCUT) / \$22/mo (PREMIERE)

Final assembly, color grading, caption sync, and audio mixing. CapCut's AI features (auto-caption, beat sync, background removal) make it the fastest editing tool for the workflow.

capcut.com · adobe.com

▣ ElevenLabs / HeyGen

VOICE & AVATAR · FREE + \$5-22/mo

AI voice cloning and avatar generation. Create a spokesperson, narrator, or AI version of yourself. Used in the Knock It Off workflow for character-driven content without on-camera talent.

elevenlabs.io · heygen.com

Choose Your Visual Direction

Before you generate a single frame, choose the visual style for your video. This decision shapes every prompt in your production workflow. Each style has a specific tool stack and prompt formula.

01 · CINEMATIC NARRATIVE

Hip-Hop · R&B · Soul

Story-driven visuals. A character exists in a world. Events unfold. The video has a beginning, middle, and end. Best tool stack: Midjourney (storyboard) □ Runway Gen-3 (video) □ CapCut (edit).

VISUAL DIRECTION KEYWORDS

Cinematic, 35mm film grain, golden hour lighting, urban or ancestral setting, character-driven narrative, dramatic composition

02 · ABSTRACT / FREQUENCY

Electronic · Trap · Ambient

Visual music — patterns, frequencies, and abstract motion synchronized to the beat. No narrative. Pure visual experience. Best tool stack: Runway (abstract motion) □ CapCut beat sync □ color grade.

VISUAL DIRECTION KEYWORDS

Abstract fluid simulation, frequency visualization, sacred geometry animation, dark background, gold and violet light trails, synchronized motion

03 · ANCESTRAL / CULTURAL

Afrobeats · Neo-Soul · Gospel

Deep visual heritage — ancient settings, ceremonial imagery, regal aesthetics, Kemetic and Moorish architectural references. Best tool stack: Midjourney (scene generation) □ Kling AI (motion) □ Premiere (finish).

VISUAL DIRECTION KEYWORDS

Ancient stone architecture, Moorish arches, Kemetic symbolism, regal Black figures, golden light, ancestral ceremony, editorial cultural photography, epic scale

04 · AVATAR / CHARACTER-LED

Podcast · Brand · Social Content

An AI avatar or animated character delivers or performs the content. The Knock It Off model — a recurring character with a consistent visual identity. Best tool stack: HeyGen (avatar) ▢ Midjourney (background) ▢ CapCut (assembly).

VISUAL DIRECTION KEYWORDS

AI character avatar, consistent branded appearance, custom background scene, talking head format, cinematic lighting, MAAT brand palette

Generating Original Music with Suno & Udio

The music is the foundation. Every visual decision — pacing, color, mood, scene length — follows the music. Generate the track first. Everything else is built around it.

THE SUNO PROMPT SYSTEM

SUNO — HIP-HOP / TRAP BEAT

[DARK TRAP BEAT] heavy 808 bass, hi-hat rolls, minor key, dramatic strings, cinematic opening, tempo 140 BPM, professional mix, anthem energy, MAAT legacy theme, Black excellence, generational wealth — no lyrics

SUNO — SOUL / R&B; WITH VOCALS

[SMOOTH R&B;] warm piano chords, live-feel drums, soulful female vocals, lyrics about [RISING FROM STRUGGLE / FINDING PURPOSE / BUILDING LEGACY], neo-soul production, vintage warmth, professional vocal mix, emotional depth

SUNO — ANCESTRAL / CEREMONIAL

[AFROBEATS FUSION] talking drum pattern, kora strings, warm brass, choral harmonies, call and response vocals, ceremonial energy, ancestral pride theme, epic cinematic scale, professional world music production

SUNO — PODCAST / BRAND INTRO

[BRAND INTRO JINGLE] 15 seconds, upbeat horn stab opening, confident energy, modern hip-hop influenced, clean mix, [BRAND NAME] theme, memorable melodic hook, professional broadcast quality

UDIO STYLE CONTROLS

UDIO — CINEMATIC INSTRUMENTAL

Cinematic orchestral hip-hop instrumental, [DARK / TRIUMPHANT / MELANCHOLIC] mood, rich string arrangement, deep 808 bass, orchestral percussion, Hans Zimmer meets Kendrick Lamar production style, epic scale, 90-120 BPM

UDIO — ELECTRONIC / FREQUENCY

Dark electronic ambient, sub-bass pulse, evolving synthesizer textures, sacred geometry theme, [SLOW BUILD TO DROP], frequency healing undertones, experimental production, Burial meets Arca aesthetic, atmospheric depth

Scene Architecture

with Midjourney

Before you generate any video footage, build your visual world in Midjourney. Generate 3-5 scene concept images that establish the color palette, the setting, the character look, and the lighting direction. These become your reference images for every video generation prompt.

SCENE CONCEPT PROMPTS

CINEMATIC SCENE — URBAN LEGACY

Regal Black man standing at a rooftop edge overlooking a city at night, wearing a dark fitted suit with gold accents, arms crossed, sovereign posture, city lights bokeh below, dramatic backlit silhouette, cinematic 35mm film photography, MAAT gold and dark color palette, music video still frame, wide establishing shot --ar 16:9 --style raw

ANCESTRAL SCENE — ARCHITECTURAL EPIC

Ancient Moorish stone archway corridor, warm golden torchlight, a lone figure in traditional robes walking toward distant light, sacred geometry carved into stone walls, atmospheric haze, cinematic wide angle, epic scale, ancestral heritage aesthetic, music video concept art --ar 16:9 --style raw

ABSTRACT SCENE — FREQUENCY WORLD

Abstract sacred geometry animation still frame, golden light frequency waves radiating outward from center point, deep space background, MAAT Eye of Truth symbol at center, violet and gold color palette, cinematic visual music concept, high detail, octane render --ar 16:9

CHARACTER SCENE — AVATAR SETUP

AI-generated character portrait: [CHARACTER DESCRIPTION], styled in [BRAND AESTHETIC], against [BRANDED BACKGROUND], dramatic three-point lighting, editorial portrait quality, consistent character reference sheet, front and 3/4 view, brand mascot design, cinematic --ar 16:9 --style raw

CLOSE-UP SCENE — DETAIL SHOTS

Extreme close-up of [GOLD COIN / ANCIENT SCROLL / HANDS WRITING / EYES], cinematic macro photography, dramatic directional lighting, MAAT gold and dark color palette, symbolic and meaningful, music video insert shot, 8K detail --ar 16:9

The Storyboard Principle

Generate 5 scene concepts before touching video generation tools. Your Midjourney images become the script your video tools follow. Upload them as reference images in Runway and Kling for visual consistency.

Bringing Your World to Motion

Upload your Midjourney scene images to Runway Gen-3 or Kling AI as reference images. Then add a motion prompt that describes what should move, in which direction, and at what pace. The AI generates a 4-10 second video clip from each reference.

RUNWAY GEN-3 MOTION PROMPTS

RUNWAY — CINEMATIC PUSH IN

Slow cinematic push-in toward the central figure, subtle atmospheric particles drifting left to right, golden bokeh lights in background slowly expanding, dramatic mood, film grain, 24fps cinematic look, 6 seconds

RUNWAY — EPIC PAN

Slow sweeping right-to-left cinematic pan across the scene, parallax depth effect with foreground elements moving faster, atmospheric haze shifting, majestic and contemplative mood, golden hour light rays intensifying, 8 seconds

RUNWAY — CHARACTER REVEAL

Begin on close-up of hands or feet, slowly pull back to reveal full figure, wind moving fabric or clothing slightly, confident and powerful energy, dramatic reveal pacing, 6 seconds

RUNWAY — ABSTRACT PULSE

Sacred geometry pattern pulsing outward from center in rhythm with music beat, golden light waves radiating and contracting, smooth looping motion, frequency visualization aesthetic, 4 seconds loopable

KLING AI MOTION PROMPTS

KLING — CROWD / COMMUNITY SCENE

A group of people in [CULTURAL SETTING] moving naturally, some looking toward camera, others in conversation, golden afternoon light, documentary natural motion, warm community energy, realistic crowd physics, 8-10 seconds

KLING — WALKING / JOURNEY SHOT

Figure walking confidently through [URBAN STREET / ANCIENT CORRIDOR / NATURE PATH], steady tracking shot following from behind then revealing profile, purposeful stride, atmospheric setting in motion, 8 seconds

Batch Generation Strategy

Generate 3-4 variations of each motion prompt. You will reject most outputs — that's expected. Target: keep the best 1-2 clips per scene concept. A 3-minute music video needs approximately 25-35 usable clips.

Assembly, Color & *Final Delivery*

01

Rough Cut

ASSEMBLY · CapCut / Premiere Pro

Import all video clips and your Suno/Udio track. Drop clips to the timeline in rough story order. Don't worry about precision yet — establish the arc and pacing. Target: rough cut at 110-120% of final video length (you'll trim in color grade).

02

Music Alignment

BEAT SYNC · CapCut Auto Beat Sync

Use CapCut's Auto Beat Sync feature — it automatically snaps cut points to the music's beat markers. For manual sync in Premiere: markers on beat drops, snare hits, and phrase changes become your cut points. Cuts on the beat feel intentional. Cuts off the beat feel like mistakes.

03

Visual Cohesion

COLOR GRADE · CapCut LUTs / Premiere Lumetri

Apply a consistent LUT (color lookup table) across all clips. For the MAAT aesthetic: warm shadows (amber/brown), slightly desaturated midtones, lifted blacks (not crushed), subtle gold highlight tinting. This unifies footage from different generation sessions into one visual language.

04

Text & Lyrics

CAPTIONS · CapCut Auto-Caption

If the track has lyrics: use CapCut's auto-caption to generate time-synced text. Style in brand fonts (Lora serif, gold color). For instrumental: add title card, artist name, and release information. Animate text on/off with simple fade — no complex transitions.

05

Platform Delivery

EXPORT · CapCut Export Settings

TikTok / Instagram Reels: 1080×1920, H.264, 30fps, 50Mbps. YouTube / Facebook: 1920×1080, H.264, 24fps, 80Mbps. Export a 15-second teaser clip (the drop or most visual moment) separately for ads. Save a lossless master .mov before converting to platform formats.

Total Production Time — Realistic Estimate

Music generation: 30 min · Scene concepts (Midjourney): 45 min · Video clip generation (Runway/Kling): 90 min · Edit & finish (CapCut): 60 min · Total: 4-5 hours for a 2-3 minute music video.

35+ Formulas,

Every Phase

Master formulas for each production tool. Fill the [BRACKETED VARIABLES]. Combine across phases for a complete, consistent visual world.

MASTER SUNO PROMPT FORMULA

SUNO UNIVERSAL FORMULA

[GENRE] [TEMPO: SLOW/MID/FAST] [MOOD DESCRIPTOR], [INSTRUMENTATION: KEY INSTRUMENTS], [VOCAL STYLE or 'no vocals'], [LYRIC THEME in 3-5 words], [PRODUCTION STYLE REFERENCE], professional mix, [ENERGY LEVEL: building/steady/explosive], [DURATION: 2 min / 3 min / 30 sec intro]

MASTER MIDJOURNEY SCENE FORMULA

MIDJOURNEY UNIVERSAL FORMULA

[SHOT TYPE: wide establishing / mid / close-up / extreme close-up] of [SUBJECT DESCRIPTION], [SETTING / LOCATION], [LIGHTING: golden hour / dramatic chiaroscuro / soft ambient / neon], [COLOR PALETTE], [MOOD / ENERGY], [PHOTOGRAPHY / ART STYLE], [CULTURAL REFERENCE if applicable], music video still frame, cinematic, photorealistic, 8K --ar 16:9 --style raw

MASTER RUNWAY MOTION FORMULA

RUNWAY UNIVERSAL FORMULA

[CAMERA MOVEMENT: slow push-in / pull-back / pan left / orbit / handheld drift], [SUBJECT MOTION: stationary / walking / turning / reaching], [ATMOSPHERIC ELEMENTS: particles / fog / light rays / wind], [MOOD / PACING: dramatic slow / energetic / contemplative], cinematic [FPS: 24], [DURATION: 4-8] seconds

ADDITIONAL SCENE PROMPTS

NIGHT CITY — HIP-HOP

Black man in designer streetwear standing under a streetlight on an empty city block at 2am, rain-slicked pavement reflecting neon and gold light, foggy breath visible, lone figure energy, cinematic hip-hop music video aesthetic, 35mm film look, wide shot --ar 16:9 --style raw

DESERT / ANCIENT EARTH

Lone figure standing at the edge of a vast desert landscape at sunrise, ancient stone ruins visible in background, traditional garments moving in wind, god-rays breaking through clouds, cinematic epic scale, ancestral journey theme, photorealistic --ar 16:9

STUDIO / PERFORMANCE

Artist in a minimal dark studio space, single dramatic spotlight overhead, emotional performance intensity, microphone or instrument visible, sweat and passion visible, concert photography aesthetic, cinematic documentary style, --ar 16:9 --style raw

INTERIOR — LUXURY STUDY

Regal study or library interior, dark wood shelves with ancient books, single candle and window light, figure reading at a carved wooden desk, warm amber tones, old money aesthetic meets cultural wealth, cinematic interior photography --ar 16:9

Your Visual Genre Playbook

HIP-HOP / TRAP

RECOMMENDED STACK: Suno · Runway Gen-3 · CapCut

Color Palette: Deep blacks, cool blues, neon accent (purple/green), gold highlights. Camera: Low angles, slow push-ins, quick cuts on beat drops. Setting: Urban architecture, empty streets, rooftops, warehouses. Mood: Confident, intense, aspirational. Reference Keywords: dark urban cinematic, 35mm film, low key lighting, streetwear editorial.

R&B; / NEO-SOUL

RECOMMENDED STACK: Suno · Kling AI · Premiere Pro

Color Palette: Warm amber, burnt orange, soft gold, cream whites. Camera: Handheld intimacy, soft focus, slow motion gestures. Setting: Intimate interiors, golden hour outdoors, vintage spaces. Mood: Emotional, vulnerable, sensual. Reference Keywords: warm analog film, soft bokeh, intimate portrait, editorial soul.

ANCESTRAL / AFROBEATS

RECOMMENDED STACK: Udio · Midjourney · Kling AI

Color Palette: Earthy ochres, deep golds, terracotta, forest greens. Camera: Wide epic establishing shots, ceremonial processions, close ritual detail. Setting: Ancient architecture, natural landscapes, ceremonial spaces. Mood: Powerful, sacred, triumphant, connected to origin. Reference Keywords: Moorish architecture, Kemetic symbolism, ancestral ceremony, epic scale.

ELECTRONIC / FREQUENCY

RECOMMENDED STACK: Udio · Runway Gen-3 · CapCut

Color Palette: Deep space blacks, electric violet, cyan, and gold frequency lines. Camera: Abstract motion, impossible perspectives, fractal zooms. Setting: Abstract digital space, sacred geometry, cosmic scale. Mood: Transcendent, hypnotic, expansive. Reference Keywords: sacred geometry animation, frequency visualization, quantum aesthetic, dark cosmic, Burial meets 2001 Space Odyssey.

This System Built *a Real Brand*

Knock It Off is a podcast brand built entirely using the Visual Frequency Kit workflow. Every element — the character, the scene, the music, the production system — was created with AI tools in a single creative weekend. Here is the exact production log:

01

CHARACTER DESIGN

TOOL: Midjourney

The Knock It Off host character was designed in Midjourney. Prompt: 'AI-generated Black male podcast host, barbershop setting, confident expression, branded clothing, editorial portrait style, consistent character.' Generated 20 variations. Selected 3 hero images for brand consistency.

02

BACKGROUND SCENE

TOOL: Midjourney

The barbershop set was built as a full scene in Midjourney. Prompt: 'Interior barbershop, vintage and modern hybrid, warm amber lighting, branded mirrors and signage, professional podcast setup visible, cinematic interior photography, brand palette.' This scene appears in every episode as the consistent visual world.

03

BRAND JINGLE

TOOL: Suno AI

The Knock It Off theme jingle was generated in Suno. Prompt: '[HIP-HOP PODCAST INTRO] confident horn stab opening, barbershop theme, energetic and professional, 15-second brand jingle, punchy production, broadcast quality.' Generated 8 variations. Final jingle selected and used across all episodes.

04

AVATAR ANIMATION

TOOL: HeyGen

The character portrait was uploaded to HeyGen and animated as a talking head. Episode scripts were fed as text input — HeyGen generated the character delivering the script in the character's voice. No on-camera talent required. No recording session. Pure AI production.

05

EPISODE ASSEMBLY

TOOL: CapCut

Each episode: character animation (HeyGen) + barbershop background (Midjourney) + brand jingle (Suno) + episode captions (CapCut auto-caption). Total production time per episode: 45 minutes. Brand is live, consistent, and scalable with zero ongoing talent cost.

"Built a complete podcast brand in a weekend. Character. Scene. Jingle. Production system. The Visual Frequency Kit is the manual for what we built."

— Moor Graphix / Knock It Off Brand

Your First Music Video

in 5 Hours

1 HOUR 1 · MUSIC

- Choose genre and mood
- Write Suno/Udio prompt
- Generate 5 variations
- Select best track
- Export as .mp3
- Note BPM and key moments (drops, breaks)

2 HOUR 2 · STORYBOARD

- Choose 1 of 4 video styles
- Write 5 Midjourney scene prompts
- Generate scenes
- Select 3-5 hero images
- Save reference images locally
- Map images to song sections

3 HOURS 3-4 · VIDEO GEN

- Upload images to Runway/Kling
- Write motion prompt for each scene
- Generate 3-4 variations per scene
- Review and select best clips
- Aim for 25-35 usable clips total
- Organize by: scene number + take

4 HOUR 5 · EDIT & FINISH

- Import all clips + music to CapCut
- Rough assembly to timeline
- Apply Auto Beat Sync
- Color grade with MAAT LUT preset
- Add captions or title cards
- Export in platform specs
- Post to TikTok first

TOTAL MONTHLY TOOL COST

TOOL	FREE TIER	PAID TIER	WHAT YOU GET
Suno AI	20 songs/day	\$10/mo	Commercial rights + 500 songs/mo
Udio	20 tracks/day	\$10/mo	Commercial rights + higher quality
Runway Gen-3	25 credits/mo	\$15/mo	625 credits (~60 video clips/mo)

Kling AI	60 credits/day	\$10/mo	Unlimited + priority generation
Midjourney	No free tier	\$10/mo	~200 images/mo
CapCut	Full app free	\$0-10/mo	All AI features included
TOTAL	Partially free	~\$45-55/mo	Complete production pipeline

"Your vision already exists. The tools just arrived."
